❖CONTENTS❖

1. STRUCTURAL ANALYSIS

1.1 NONLINEAR STRUCTURE REDUCTION BY GROUP THEORY, A.Y.T. Leung, C.K. Wong and J.K.W. Chan, Department of Civil and Structural Engineering, University of Hong Kong, Hong Kong 1

1.2 CYCLE BASES OF GRAPHS FOR SPARSE FLEXIBILITY MATRICES, A. Kaveh* and G.R. Roosta#, *Iran University of Science and Technology, Tehran, Iran, #Building and Housing Research Centre, Tehran, Iran 7

2. FINITE DIFFERENCE METHODS

2.1 A DIFFERENT APPROACH TO BOUNDARY MODELLING FOR NEUMANN CONDITION ON A CURVED BOUNDARY AT ARBITRARY IRREGULAR GRIDS, M. Arad, G. Ben-Dor and A. Yakhot, Department of Mechanical Engineering, Ben-Gurion University of Negev, Beer Sheva, Israel 13

2.2 TORSION OF CRACKED RINGS, A.Y.T. Leung, J.D. Hu and J.K.W. Chan, Department of Civil and Structural Engineering, University of Hong Kong, Hong Kong 21

3. ANALYSIS OF SKELETAL STRUCTURES

3.1 DAMAGE ASSESSMENT OF BEAM STRUCTURES, C. Bolcan, M.R. Gecit and N. Akkas, Department of Engineering Sciences, Middle East Technical University, Ankara, Turkey 27

3.2 DISTORTION IN MECHANICS OF ELASTIC-PLASTIC FRAMES, J. Atkociunas, A. Norkus and L. Rimkus, Department of Structural Mechanics, Vilnius Technical University, Vilnius, Lithuania 37

3.3 STABILITY ANALYSIS OF THREE-DIMENSIONAL GABLED FRAMES, Y.-C. Wang and C. Wei, Department of Civil Engineering, Chinese Military Academy, Taiwan, Republic of China 43

3.4 CONTINUUM MODELLING OF BEAMLIKE LATTICE TRUSSES, B. Burgardt and P. Cartraud, Laboratory of Mechanics and Materials, Ecole Centrale de Nantes, Nantes, France 51

4. ANALYSIS AND DESIGN OF PLATE AND SHELL STRUCTURES

4.1 FULL RANGE RESPONSE OF CIRCULAR STEEL PLATES SUBJECTED TO COMBINED TRANSVERSE PRESSURE AND EDGE COMPRESSION, G.J. Turvey and H. Drinali, Engineering Department, Lancaster University, Lancaster, United Kingdom 61

4.2 A NEW FINITE STRIP METHOD WITH HELLINGER-REISSNER PRINCIPLE FOR PLATE BENDING, G.F. Sun* and J. Liu#, *Chair of Material Handling Engineering Logistic, Technical University of Munich, Germany, #Department of Mechanical Engineering, North-East University, Shenyang, China 69

5. GEOMETRIC NON LINEAR PROBLEMS

5.1 ON THE GEOMETRIC STIFFNESS MATRIX IN COROTATIONAL SPACE FRAME ELEMENTS, T. Sokol, Warsaw University of Technology, Centre of Computer Methods, Warsaw, Poland 77

5.2 CHARACTERISTICS OF CABLE DEFORMATION ON CABLE-STAYED AND SUSPENSION BRIDGES, Y.-C. Leu and Y.-C. Wang, Department of Civil Engineering, Chinese Military Academy, Taiwan, Republic of China 91

5.3 GEOMETRICALLY EXACT ANALYSIS OF INITIALLY CURVED RODS, P.M. Pimenta, Department of Structural and Foundation Engineering, University of Sao Paulo, Sao Paulo, Brazil 99

5.5 NON-LINEAR DYNAMIC ANALYSIS ON THE SNAP-THROUGH OF 2D-FRAMES, J.L. Meek and Q. Xue, Civil Engineering Department, The University of Queensland, Australia 109

6. STRUCTURAL ANALYSIS AND DESIGN

6.1 THE APPLICATION OF THE SEMI-CONTINUUM METHOD OF ANALYSIS TO DETERMINE DISTRIBUTION COEFFICIENTS FOR LONGITUDINAL BENDING MOMENTS IN SIMPLY SUPPORTED BRIDGE DECKS UNDER THE ACTION OF TRAFFIC LOADS TO EC1, M.J. Ryall, Civil Engineering Department, University of Surrey, Guildford, United Kingdom 115

7. ANALYSIS AND DESIGN OF REINFORCED CONCRETE STRUCTURES

7.1 ANALYSIS OF REINFORCED CONCRETE PLATE STRUCTURES BY FINITE STRIP METHOD, D.D. Milasinovic, R.J. Folic and D.I. Kovacevic, Faculty of Technical Science, University of Novi Sad, Novi Sad, Yugoslavia..... 121

7.2 INFLUENCE OF EARTHQUAKE CHARACTERISTICS TO NONLINEAR BEHAVIOUR OF REINFORCED CONCRETE STRUCTURES, A. Elenas, A. Liolios and L. Vasiliadis, Department of Civil Engineering, Democritus-University of Thrace, Xanthi, Greece 133

7.3 INCREASING OF NUMERICAL EFFICIENCY IN NONLINEAR ANALYSIS OF REINFORCED CONCRETE BEAM ELEMENTS, M. Sekulovic*, D. Milasinovic# and D. Kovacevic#, *Civil Engineering Faculty, University of Belgrade, Belgrade, Yugoslavia, #Civil Engineering Faculty, University of Novi Sad, Novi Sad, Yugoslavia..... 139

7.4 A STUDY OF SEISMIC RESPONSE OF REINFORCED CONCRETE FRAME STRUCTURES BY DIRECT INTEGRATION METHOD, E. Vasseva, Department of Earthquake Engineering, Central Laboratory for Seismic Mechanics and Earthquake Engineering, Sofia, Bulgaria..... 151

8. ANALYSIS OF STEEL STRUCTURES

8.1 ANALYSIS OF STEEL FRAMES WITH SEMI-RIGID COLUMN-BASE CONNECTIONS, J. Balogh and M. Ivanyi, Department of Steel Structures, Technical University of Budapest, Budapest, Hungary 159

8.2 COMPUTATIONAL ANALYSIS OF LARGE-AMPLITUDE SETTLEMENT AND SHELL OVALIZATION OF OIL TANKS, M.A. Haroun*, Y. Wang* and M. Martinez#,*Department of Civil and Environmental Engineering, University of California, Irvine, United States of America, #Structural Mechanics Section, INTEVEP, S.A., Los Toques, Venezuela..... 165

8.3 NUMERICAL MODELLING OF COLUMN-BASE CONNECTIONS, L. Dunai*, S. Adany*, F. Wald# and Z. Sokol#, *Department of Steel Structures, Technical University of Budapest, Budapest, Hungary, #Department of Steel Structures, Czech Technical University, Prague, Czech Republic 171

8.4 THE ANALYSIS AND THE 3D FINITE ELEMENT SIMULATION OF STEEL BOLTED END-PLATE CONNECTIONS, B.N. Nemati and D. Le Houedec, Laboratory of Mechanics and Materials, Central School of Nantes, Nantes Cedex, France 179

9. MATERIAL MODELLING

9.1 A STEP-BY-STEP COMPUTATION METHOD TO ACCOUNT FOR TIME-DEPENDENT EFFECTS IN BUILDING STRUCTURES, B. Jurkiewiez, J.-F. Destrebecq and A. Vergne, Laboratory of Civil Engineering, University Blaise Pascal, Clermont-Ferrand, France 189

10. STRUCTURAL RELIABILITY

10.1 APPLICATION OF FUZZY SETS IN STRUCTURAL RELIABILITY, J. Niczyj, Department of Civil Engineering and Architecture, Technical University of Szczecin, Szczecin, Poland 199

10.2 RELIABILITY AS A MEASURE OF ACTIVE CONTROL EFFECTIVENESS, P. Venini and C. Mariani, Department of Structural Mechanics, University of Pavia, Pavia, Italy 205

11. DYNAMIC ANALYSIS OF STRUCTURES

11.1 A STUDY ON THE CRACK DETECTION USING EIGENFREQUENCY TEST DATA, Y.-S. Lee and M.-J. Chung, Department of Mechanical Design Engineering, Chung-Nam National University, Tae-Jon, Korea 211

11.2 A VIBRATION AND STRESS ANALYSIS OF STIFFENED BOX STRUCTURES, Y.-S. Lee*, J.-D. Han#, Y.-H. Han** and J. Suh**, *Department of Mechanical Design Engineering, Chung-Nam National University, Tae-Jon, Korea, #Daw-Woo Heavy Industries, Tae-Jon, Korea, **KIMM, Tae-Jon, Korea 225

11.3 A SIMPLIFIED METHOD FOR MODAL ANALYSIS OF BRIDGES, M. Kallo, Department of Steel Structures, Technical University of Budapest, Budapest, Hungary 233

11.4 DYNAMICS OF RODS: NUMERICAL FORMULATION, A.D. Campos and F.A. Rochinha, COPPE-UFRJ, Rio de Janeiro, Brazil.. 239

11.5 FINITE ELEMENT MODELLING OF STATIC, TRANSIENT - DYNAMIC, ELASTIC, INELASTIC ANALYSIS, K. Natarajan*, N. Rajagopalan#, A. Rajaraman* and R. Radhakrishnan#, *Structural Engineering Research Centre, Madras, India, #Department of Civil Engineering, Indian Institute of Technology, Madras, India 247

11.6 SPECTRAL ANALYSIS OF AN OFFSHORE TOWER, M. Hartnett, Department of Civil, Structural and Environmental Engineering, Trinity College, Dublin, Ireland 253

11.7 NUMERICAL EVALUATION OF HYDRODYNAMIC LOADINGS ON FIXED OFFSHORE STRUCTURES, M. Hartnett* and T. Mullarkey#, *Department of Civil, Structural and Environmental Engineering, Trinity College, Dublin, Ireland, #Department of Civil Engineering, University College Galway, Ireland 263

12. SEISMIC DESIGN OF STRUCTURES

12.1 SEISMIC RESPONSE AMPLIFICATION OF SUBMERGED SECONDARY SYSTEMS IN BASE-ISOLATED STRUCTURES, T.-M. Shin* and K.-J. Kim#, *Korea Atomic Energy Research Institute, Taejon, Korea, #Department of Mechanical Engineering, KAIST, Taejon, Korea 269

13. THE USE OF FINITE ELEMENT METHODS FOR PRACTICE

13.1 FINITE ELEMENT MODELS FOR THE ANALYSIS OF STEEL AND CONCRETE IN CONSTRUCTION, M. Guo and C.K. Jolly, Department of Civil and Environmental Engineering, University of Southampton, Southampton, United Kingdom 283

13.2 FINITE ELEMENT ANALYSIS OF A ROTATING SHAFT-DISK SYSTEM, N. Lobontiu, Technical University of Cluj-Napoca, Romania 295

13.3 EFFECT OF SUBGRADE CAVITIES ON THE FAILURE OF RC SLABS, A.A. Khatlan, M.A. Baig and N.A. Al-Shayea, Department of Civil Engineering, King Fahd University of Petroleum and Minerals,Dhahran, Saudi Arabia 301

14. ANALYSIS OF CABLE STRUCTURES

14.1 NONLINEAR DYNAMIC STABILITY ANALYSIS OF CABLE STRUCTURES, Q.-L. Zhang* and U. Peil#, *Tongji University, Shanghai, China, #Technical University of Braunschweig, Braunschweig, Germany 307

❖PREFACE❖

This volume contains a selection of papers presented at *The Third International Conference in Computational Structures Technology*, held in Budapest from 21st August-23rd August 1996. The papers in this volume include the following topics: Structural Analysis; Finite Difference Methods; Analysis of Skeletal Structures; Plate and Shell Structures; Geometric Non Linear Problems; Analysis and Design of Reinforced Concrete Structures; Analysis of Steel Structures; Structural Reliability; Dynamic Analysis of Structures; the Use of the Finite Element Method in Practice; and Analysis of Cable Structures. Other papers from the conference are published in:

- Advances in Computational Structures Technology
  Civil-Comp Press, 1996, ISBN 0-948749-40-7
- Advances in Finite Element Technology
  Civil-Comp Press, 1996, ISBN 0-948749-41-5
- Advances in Optimization for Structural Engineering
  Civil-Comp Press, 1996, ISBN 0-948749-42-3
- Advances in Analysis and Design of Composites
  Civil-Comp Press, 1996, ISBN 0-948749-43-1
- Advances in Computaional Methods for Simulation
  Civil-Comp Press, 1996, ISBN 0-948749-44-X
- Advances in Boundary Element Methods
  Civil-Comp Press, 1996, ISBN 0-948749-46-6

I should like to thank all the authors for their contributions and in particular those who presented their papers in Budapest. I must also thank the members of the Conference Editorial Board who helped in many ways before and during the conference. The members of the Editorial Board for Computational Structures Technology Conference 1996, were: Professor H. Adeli, USA, Professor N. Akkas, Turkey, Professor E. Alarcon, Spain, Professor J. Argyris, Germany, Professor O. Axelsson, The Netherlands, Professor K.J. Bathe, USA, Dr L. Berke, USA, Professor H.J.C. Barbosa, Brazil, Professor J.W. Baugh, USA, Professor T. Belytschko, USA, Professor P.G. Bergan, Norway, Professor D. Beskos, Greece, Professor P. Bettes, UK, Professor N. Bicanic, UK, Professor R.I. Borja, USA, Professor F. Brezzi, Italy, Dr John W. Bull, UK, Professor C. Cinquini, Italy, Dr. A.H.C. Chan, UK, Professor I. St Doltsinis, Germany, Professor I.S. Duff, UK and France, Dr L. Dunai, Hungary, Professor A. Eriksson, Sweden, Professor D. Frangopol, USA, Professor J.A. Teixeira de Freitas, Portugal, Professor F. Frey, Switzerland, Professor R. Fruchter, USA, Professor M.B. Fuchs, Israel, Professor G. Gambolati, Italy, Professor M. Geradin, Belgium, Professor D.E. Grierson, Canada, Professor D. Hartmann, Germany, Professor P. Hajela, USA, Professor E. Hinton, UK, Professor M.A. Hogge, Belgium, Professor T.J.R. Hughes, USA, Professor M. Ivanyi, Hungary, Professor W.M. Jenkins, UK, Dr P.K. Jimack, UK, Professor S. Kaliszky, Hungary, Professor D.I. Karabalis, USA, Professor A. Kaveh, Iran, T. Kenny, UK, Dr A.I. Khan, Australia, Professor N. Kikuchi, USA, Professor U. Kirsch, Israel, Professor Dr M. Kleiber, Poland, Professor V.K. Koumousis, Greece, Professor W.B. Kratzig, Germany, Professor P. Ladeveze, France, Professor K.L. Lawrence, USA, Dr. S.H. Lee, USA, Professor P. Leger, Canada, Professor A.Y.T. Leung, Hong Kong, Dr. R. Levy, Israel, Professor A. Liolios, Greece, Professor W.K. Liu, USA, J. Mackerle, Sweden, Professor G. Maier, Italy, Professor J. Mandel, USA, Professor H.A. Mang, Austria, Professor I.M. May, UK, Dr J.J. McKeown, UK, Professor J.L. Meek, Australia, Dr H.P. Mlejnek, Germany, Professor G. Molnarka, Hungary, Professor C.A. Mota Soares, Portugal, Dr D.T. Nguyen, USA, Professor A. K. Noor, USA, Professor R. Ohayon, France, Professor E. Onate, Spain, Dr K. Orsborn, Sweden, Professor D.R.J. Owen, UK, Professor M. Papadrakakis, Greece, Professor P.Y. Papalambros, USA, Professor K.C. Park, USA, Professor D. Parsons, USA, Dr. M.N. Pavlovic, UK, Professor M.S. Pereira, Portugal, Dr V.K. Peshkam, UK, Professor E. Ramm, Germany, Professor F. Rammerstorfer, Austria, Professor G. De Roeck, Belgium, Professor A. Samartin, Spain, Professor B. Schrefler, Italy, Professor K. Sweitzerhof, Germany, Dr. G.M. Seed, UK, Professor N. Schiraishi, Japan, Dr. H.D. Simon, USA, Professor G.S. Springer, USA, Dr. I. Sobieski, USA, Professor K.S. Surana, USA, Professor C.A. Syrmakezis, Greece, Professor B.A. Szabo, USA, Professor R. Szilard, USA, Professor G Thierauf, Germany, Dr G. Turvey, UK, Professor Y. Ueda, Japan, Dr G. Vanderplaats, USA, Dr V.B. Venkayya, USA, Professor K.S. Virdi, UK, Professor Z. Waszczyszyn, Poland, Professor N.P. Weatherill, UK, Professor N-E Wiberg, Sweden, Professor J.P. Wolf, Switzerland, Professor W. Wunderlich, Germany, Professor Yong Bin Yang, Taiwan, and Dr. Th. Zimmermann, Switzerland.

The idea of holding the Third International Conference on Computational Structures Technology in Budapest came from János Sziveri, Heriot-Watt University, Edinburgh. I should like to thank him for his help, advice and support over the two year period before this conference. My thanks are also due to all at Civil-Comp Press for their help and perserverance in the realisation of this conference, particularly Szandra Köves and Maisie Sales. The assistance of

members of the Structural Engineering Computational Technology Research Group at Heriot-Watt University, Edinburgh is gratefully acknowledged particularly from Péter Iványi, Biao Cheng, Ardeshir Bahreininejad, Joao P.B. Leite and Janet Wilson.
