Keyword Index

The numbers in this index are paper numbers.

- adaptive analysis, 31
- adaptive time-stepping, 42
- application, 22
- arbitrary Lagrangian-Eulerian formulation, 39
- assembly, 44

- back-projection, 18
- balancing Neumann-Neumann preconditioner, 37
- Beowulf clusters, 30
- bone, 35
- boundary element method, 27

- C#, 11
- cell, 18
- cement paste, 34
- channel bonding, 30
- client API, 22
- cluster, 14
- cluster computing, 15
- cluster multi-core computing, 26
- cluster performance tuning, 30
- composite material, 4
- computational fluid dynamics, 1, 2, 17, 45
- computer aided engineering, 41
- computerized tomography, 18
- conjugate gradient method, 37
- contact, 44
- contact problems with friction, 6
- continuations, 29
- CUDA, 17

- damage, 4
- data grids, 21
- dataflow, 24
- decision tree, 21
- differential algebraic equations, 41

- discontinuous Galerkin, 5
- discrete element method, 20
- discrete particle method, 8
- distributed computing, 12
- DL_POLY, 3
- domain decomposition, 4, 5, 6, 7, 8, 35, 44
- dual-primal, 5
- dynamic load balancing, 12, 31

- earthquake engineering, 36
- earthquake simulation, 28
- element-by-element, 34
- event tracing, 16

- FETI, 5
- finite elements, 12, 28, 31
- finite strip method, 33
- fixed-point problems, 6
- fluid-structure interaction, 46
- friction, 44

- genetic algorithm, 9
- geometrically nonlinear analysis, 33
- geophysical well-logs modeling inversion interpretation, 26
- gLite, 20, 25
- globus, 25
- GPU computing, 33
- granular flow, 39
- graphics processing unit, 17
- grid computing, 15, 20, 23, 24, 27
- grid visualization e-service, 20
- grid-enabled, 22
- gridsolve, 27

- heterogeneous environment, 23
