These Conferences could not have been organised without the contribution of many people who helped in their planning, organisation and execution. Professor G. De Roeck was a valuable source of help locally in Leuven and in many aspects of the organisation of the conferences. Professor K.J. Bathe and Professor A.K. Noor were a constant

source of encouragement and their continued support of this conference series is gratefully acknowledged. Professor Z. Bittnar, Professor M. Iványi, Professor J.P. Muzeau and Professor G. De Roeck contributed to the success of the meeting by helping with the organisation and editorial of the volumes as listed above.

My thanks are also due to all at Civil-Comp Press for their help and perseverance in the realisation of these conferences, particularly Mrs Rosemary Brodie. The assistance of members of the Structural Engineering Computational Technology Research Group at Heriot-Watt University, Edinburgh is gratefully acknowledged especially from Roman Putanowicz, Janos Nező and Péter Iványi. The delights of Leuven were first drawn to my attention by Jelle Muylle, a former student of Professor G. De Roeck. Jelle's tireless and enthusiastic assistance in bringing these Conferences to fruition is gratefully acknowledged.
