◦ CONTENTS ◦

1 STRUCTURAL ANALYSIS

1.1	TOPOLOGICAL TRANSFORMATIONS APPLIED TO STRUCTURAL MECHANICS, A. Kaveh, Department of Civil Engineering, Iran University of Science and Technology, Narmak, Tehran, Iran	1
1.2	THE ANALYSIS OF LARGE NON-UNIFORM SPATIAL SHEAR WALL SYSTEMS BY A DISCRETE FORCE METHOD, D. Johnson and A. Nadjai, Department of Civil and Structural Engineering, The Nottingham Trent University, Nottingham, England	11
1.3	A COMPARATIVE STUDY OF THE COMBINATORIAL AND ALGEBRAIC FORCE METHODS, A. Kaveh and A. Mokhtar-zadeh, Department of Civil Engineering, Iran University of Science and Technology, Narmak, Tehran, Iran . . .	21
1.4	THE ANALYSIS AND DESIGN OF FRAMED STRUCTURES USING UNIMODAL COMPONENTS, M.B. Fuchs, Department of Solid Mechanics, Materials and Structures, The Iby and Aladar Fleischman Faculty of Engineering, Tel Aviv University, Israel	31
1.5	CONDITIONING OF STRUCTURAL STIFFNESS MATRICES, A. Kaveh and I. Ghaderi, Department of Civil Engineering, Iran University of Science and Technology, Narmak, Tehran, Iran	39

2 ANALYSIS OF BEAM-COLUMN STRUCTURES

2.1	THE METHOD OF SEGMENT LENGTH FOR DIRECT INSTABILITY ANALYSIS OF R/C COLUMNS, S.E.E. El-Metwally, Institute for Structural Design, University of Stuttgart, Germany	47
-----	--	----

3 FINITE ELEMENT MESH GENERATION

3.1	A REVIEW OF MESH GENERATION METHODS, C.J.M. Hewett and J.W. Bull, Engineering Design Centre, University of Newcastle upon Tyne, England .	55
3.2	THREE DIMENSIONAL ADAPTIVE SURFACE RE-MESHING FOR LARGE DISPLACEMENT FINITE ELEMENT ANALYSIS, A.I. Khan and B.H.V. Topping, Heriot-Watt University, Edinburgh, Scotland	63

4 FINITE ELEMENTS: FORMULATION AND SOLUTION

4.1	ON THE IMPLEMENTATION OF A MIXED FINITE ELEMENT FORMULATION BASED ON DIGITAL INTERPOLATION, L.M. Santos Castro and J.A. Teixeira de Freitas, Departmenta de Engenharia Civil, Universidade Tecnica de Lisboa, Lisbon, Portugal	71
4.2	A DISCRETE ERROR ESTIMATORS FOR FINITE ELEMENT ANALYSIS, R. Targowski, G. Guerlement and D. Lamblin, Faculte Polytechnique Mons, Institut Mecanique et Architecture, Mons, Belgium	81
4.3	FINITE ELEMENT ANALYSIS OF AIR FLOW IN GRAIN BINS, Y. Feng and Y. Hua, Beijing Agricultural Engineering University, Beijing, P.R. China	91
4.4	ALTERNATIVE APPROACH FOR HYBRID STRESS ELEMENTS WITH INCOMPATIBLE DISPLACEMENTS, Yu-Feng Dong and J.A. Teixeira de Freitas, Departmenta de Engenharia Civil, Universidade Tecnica de Lisboa, Lisbon, Portugal	99

4.5	STRESS ANALYSIS OF STIFFENED SHELLS WITH INTEGRALLY STIFFENED SEMILOOF SHELL FINITE ELEMENTS, G. Caveney, Engineering Design Centre, University of Newcastle upon Tyne, Newcastle upon Tyne, England	107
4.6	HIERARCHICAL 2-D EQUILIBRIUM FINITE ELEMENTS BASED ON CHEBYSHEV INTERPOLATION FUNCTIONS, J.A. Teixeira de Freitas, Departamento de Engenharia Civil, Universidade Tecnica de Lisboa, Lisbon, Portugal	115
4.7	FOURTH ORDER RUNGE-KUTTA METHOD IN 1D FOR HIGH GRADIENT PROBLEMS, R. Cortell, ETSI de Caminos, Canales y Puertos, Universidad Politecnica de Valencia, Valencia, Spain	121
5	THIN WALLED STRUCTURES	
5.1	A CUBIC EULERIAN FORMULATION FOR ELASTIC WARPING STRUCTURES, B.A. Izzuddin and D. Lloyd Smith, Department of Civil Engineering, Imperial College of Science, Technology & Medicine, London, England	125
5.2	SHEAR LAG REVISITED: THE USE OF SINGLE FOURIER SERIES FOR DETERMINING THE EFFECTIVE BREADTH IN PLATED STRUCTURES, N. Tahan†, M.N. Pavlović‡ and M.D. Kotsovos§, †SLP Engineering, London, ‡Department of Civil Engineering, Imperial College of Science and Technology, London, §Faculty of Civil Engineering, National Technical University of Athens, Athens, Greece	133
5.3	A COMPUTER PROGRAM FOR CALCULATING LONGITUDINAL AND SHEAR STRAINS IN OPEN THIN-WALLED CONCRETE STRUCTURES, S.A. El-Hammasi, Kuwait Institute of Technology, Kuwait	143
6	ANALYSIS AND DESIGN OF PLATES	
6.1	DIAMETRALLY STIFFENED CIRCULAR PLATES - AN ELASTIC LARGE DEFLECTION ANALYSIS, G.J. Turvey† and M. Salehi‡, †Department of Civil Engineering, University of Lancaster, Bailrigg, Lancaster, England, ‡Department of MEchanical Engineering, Amir Kabir University, Tehran, Iran	151
6.2	ELASTIC RESPONSE OF MODERATELY THICK SECTOR PLATES, M. Salehi and A.G. Shahidi, Department of Mechanical Engineering, Amirkabir University of Technology, Tehran, Iran	159
6.3	OPTIMAL DESIGN OF PLATES FOR SHEAR BUCKLING, R. Levy and V. Sokolinsky, Department of Civil Engineering, Technion, Israel Institute of Technology, Haifa, Israel	171
6.4	NONLINEAR FIRST YIELD ANALYSIS OF CIRCULAR PLATES SUBJECTED TO COMBINED UNIFORM PRESSURE AND EDGE COMPRESSION, G.J. Turvey† and H. Drinali‡, †Department of Civil Engineering, University of Lancaster, Lancaster, England, ‡Department of Civil Engineering, University of Oran, Oran, Algeria	181
7	NON-LINEAR STRUCTURAL ANALYSIS	
7.1	DISCUSSION OF FOUR GENERAL APPROACHES TO PATH FOLLOWING IN NONLINEAR STATICS, T. Bulenda, Ingenieurbüro für das Bauwesen Prof. Dipl.-Ing. U. Bulenda, Zeitlarn, Germany, <i>formerly:</i> Institute of Statics, Technical University of Munich, Germany	185
7.2	BEHAVIOUR OF SIMPLY SUPPORTED DEEP BEAMS DESIGNED USING NON-ELEASTIC STRESS FIELDS, P. Bhatt and A. Bensalem, Department of Civil Engineering, University of Glasgow, Glasgow, Scotland	191

8	STRUCTURAL OPTIMIZATION AND SENSITIVITY ANALYSIS	
8.1	SENSITIVITY ANALYSIS OF STRUCTURES: A REVIEW, D. Novák†, B. Těplý† and N. Shiraishi‡, †Technical University of Brno, Faculty of Civil Engineering, Department of Structural Mechanics, Brno, Czech Republic, ‡Department of Civil Engineering, Kyoto University, Japan	201
8.2	OPTIMISATION OF YIELD LINE PATTERNS, A. Jennings†, A. Thavalingam†, J.J. McKeown‡ and D. Sloan†, †Department of Civil Engineering, ‡Department of Engineering Mathematics, Queen's University of Belfast, N. Ireland	209
8.3	A TWO-STAGE DESIGN OPTIMIZATION OF SHELL STRUCTURES, B. Štok and A. Mihelič, Faculty of mechanical Engineering, University of Ljubljana, Ljubljana, Slovenia	215
9	EIGENVALUE AND DYNAMIC ANALYSIS	
9.1	DYNAMIC RESPONSE OF LARGE COMPLEX SEGMENTALLY PERIODIC STRUCTURES BY THE SYMPLECTIC MATRIX METHOD, M. Zhou† and F.W. Williams‡, †Department of Engineering Mechanics, Tsinghua University, Beijing, PR China, ‡Division of Structural Engineering, School of Engineering, University of Wales College of Cardiff, Wales	219
9.2	A FAST ITERATIVE ALGORITHM FOR EIGENVALUE DETERMINATION, R.P. West† and M.N. Pavlović‡, †Department of Civil Engineering, Trinity College, Dublin, Ireland, ‡Department of Civil Engineering, Imperial College of Science and Technology, London, England	229
9.3	FREE VIBRATIONS OF TIMOSHENKO BEAMS WITH VARIABLE CROSS SECTIONS: A LAGRANGIAN APPROACH, N.M. Auciello, Department of Structural Engineering and Soil Mechanics, University of Basilicata, Potenza, Italy	237
9.4	GROUP-THEORY CONSIDERATIONS OF FINITE-DIFFERENCE PLATE EIGENVALUE PROBLEMS, A. Zingoni†, M.N. Pavlović‡, D. Lloyd Smith† and G.M. Zloković‡, †Department of Civil Engineering, Imperial College of Science, Technology & Medicine, London, England, ‡Faculty of Architecture, University of Belgrade	243
9.5	A DISCRETE ELEMENT MODEL FOR BEAMS CARRYING A MOVING MASS, M. Mofid† and J.E. Akin‡, Department of Civil Engineering, Sharif University of Technology, Tehran, Iran, ‡Department of Mechanical Engineering and Material Science, Rice University, Houston, United States of America	257
10	SUBSTRUCTURING	
10.1	APPLICATION OF SUBSTRUCTURING IN SPACE TRUSSES USING PYRAMIDAL STRUCTURAL UNITS, A.I. El-Sheikh and A.S.K. Kwan, Department of Civil Engineering, University of Dundee, Dundee, Scotland	263
10.2	SUBSTRUCTURING AND PARALLEL ANALYSIS OF THIN WALLED-BOX GIRDERS, A. Faftis and A.Y. Rong, Department of Civil Engineering, Arizona State University, Tempe, United States of America	279
11	MATERIALS MODELLING	
11.1	ANALYSIS OF CRACK PROPAGATION PATH IN TWO-DIMENSIONAL BODIES USING THE FINITE ELEMENT METHOD, A.A. Aaghaakouchak and J.V. Amiri, Department of Civil Engineering, School of Engineering, Tarbiat Modarres University, Tehran, Iran	285

11.2 FAILURE PREDICTION OF INHOMOGENEOUS ORTHOTROPIC MATERIAL, P. P. Papados, Texas A & M University, Department of Civil Engineering, College Station, Texas, United States of America 291

◦ PREFACE ◦

This volume contains some of the papers presented at *CIVIL-COMP93*, The Fifth International Conference on Civil and Structural Engineering Computing and *Artificial Intelligence CIVIL-COMP93*, The Third International Conference in the Application of Artificial Intelligence to Civil and Structural Engineering. These conferences were held currently from 17th - 19th August 1993 at Heriot-Watt University, Edinburgh, Scotland. Other papers from these conferences are published in:

- Information Technology for Civil and Structural Engineers, Civil-Comp Press, (ISBN 0-948749-16-14)
- Knowledge Based Systems for Civil and Structural Engineering, Civil-Comp Press, (ISBN 0-948749-19-9)
- Developments in Civil and Construction Engineering Computing, Civil-Comp Press, (ISBN 0-948749-17-2)
- Developments in Structural Engineering Computing, Civil-Comp Press, (ISBN 0-948749-20-2)
- Neural Networks and Combinatorial Optimization in Civil and Structural Engineering, Civil-Comp Press, (ISBN 0-948749-18-0)

I should like to thank all the authors for their contribution and in particular those who travelled to Edinburgh to present their papers at the Conferences. I should also like to thank members of the Conference Advisory Boards for their assistance.

The members of the *CIVIL-COMP93* Conference Advisory Board were: Dr T.J.A. Agar, University of Glasgow, U.K.; Dr R.J. Allwood, University of Technology, Loughborough, U.K.; Dr M.R. Barnes, The City University, London, U.K.; Dr P. Bhatt, University of Glasgow, U.K.; Dr J.W. Bull, University of Newcastle upon Tyne, U.K.; Dr H.C. Chan, University of Hong Kong, Hong Kong; Professor Chang-Koon Choi, Korea Advanced Institute of Science and Technology, South Korea; Professor J Christian, University of Brunswick, Canada; Professor B.M. Das, Southern Illinois University at Carbondale, United States of America; Professor H. Eschenauer, University of Seigen, Germany; Professor D. Frangopol, University of Colorado at Boulder, United States of America; Professor J.A. Teixeira de Freitas, Universidade Tecnica de Lisboa, Portugal; Professor D.E. Grierson, University of Waterloo, Canada; Professor G. Guerlement, Faculte Polytechnique Mons, Belgium; Professor E. Hinton, University College of Wales, Swansea, U.K.; Professor K.C. Hover, Cornell University, United States of America; Professor A. Jennings, The Queen's University of Belfast, U.K.; Professor A. Kaveh, Iran University of Science and Technology, Iran; A.I. Khan, Heriot-Watt University, Edinburgh, U.K.; Professor U. Kirsch, Technion - Israel Institute of Technology, Israel, Dr R Levy Technion - Israel Institute of Technology, Israel; Professor I.A. MacLeod, University of Strathclyde, Glasgow, U.K.; Professor I. May, Heriot-Watt University, Edinburgh, U.K.; Professor R. McCaffer, University of Technology, Loughborough, U.K.; Professor J.L. Meek, University of Queensland, Australia; Professor R.E. Melchers, The University of Newcastle, Australia; Professor M. Papadrakakis, National Technical University of Athens, Greece; Dr F. Papp, Technical University of Budapest, Hungary; Dr M. Pavlovic, Imperial College, London, U.K.; Dr R. Powell, Brunel University, U.K.; Professor R. Richard, The University of Arizona, United States of America; Professor G. De Roeck, Katholieke Universiteit te Leuven, Belgium; Professor G. Rozvany, University of Essen, Germany; Professor R.L. Sack, University of Oklahoma, United States of America; Professor M.P. Saka, University of Bahrain, State of Bahrain; Professor A. Samartin, Mecanica de los Medios Continuos, Spain; Professor N. Shiraiishi, Kyoto University, Japan; Professor L.M.C. Simoes, University of Coimbra, Portugal; Dr G. Singh, University of Leeds, U.K.; Dr T.D. Sloan,

The Queen's University of Belfast, U.K.; Dr D. Lloyd Smith, Imperial College, London, U.K.; Gordon Smyrell, University of Teesside, U.K.; Professor W.R. Spillers, New Jersey Institute of Technology, United States of America; Professor R.M. Stark, University of Delaware, United States of America; Professor H. Sugimoto, Muroran Institute of Technology, Japan; David Taffs, Ove Arup & Partners, London, U.K.; Professor A.B. Templeman, University of Liverpool, U.K.; Professor G. Thierauf, University of Essen, Germany; Dr D.G. Toll, University of Durham, U.K.; Professor N.S. Trahair, The University of Sydney, Australia; Dr G.J. Turvey, University of Lancaster, U.K.; Professor K.S. Viridi, The City University, London, U.K.; Dr S. Walker, National Rivers Authority, Warrington, U.K.; Dr A. Watson, Leeds University, U.K.; Dr F.L. Wong, University of Hertfordshire, U.K.; and Professor Yong Bin Yang, National Taiwan University Taipei, Taiwan.

The members of the *Artificial Intelligence CIVIL-COMP93* Advisory Board were: Dr M. Alshawi, University of Salford, U.K.; Professor T. Arciszewski, Wayne State University, United States of America; Dr E Balagurusamy, National Centre for Expert Systems, India; Dr R Beheshti, Delft University of Technology, The Netherlands; Professor D.I. Blockley, University of Bristol, U.K.; Dr D.A. Bradley, University of Lancaster, U.K.; Dr C. Burgoyne, University of Cambridge, U.K.; D. Chamberlain, The City University, U.K.; W.T. Chan, National University of Singapore; Dr T. Cornick, University of Reading, U.K.; Dr R. Coyne, The University of Sydney, Australia; Dr I.E.G. Davey-Wilson, Oxford Polytechnic, U.K.; Dr C.L. Dym, University of Massachusetts, United States of America; E.W. East, US Army Construction Engineering Research Laboratory, United States of America; Professor S.J. Fenves, Carnegie-Mellon University, United States of America; Dr M.A. Fischer, Stanford University, United States of America; Dr R. Fruchter, Stanford University, United States of America; Dr H. Furuta, Kyoto University, Japan; Professor J.M. De La Garza, Virginia Polytechnic Institute and State University, United States of America; Professor J.S. Gero, The University of Sydney, Australia; Professor F.C. Hadipriono, Ohio State University, United States of America; Professor P. Hajela, Rensselaer Polytechnic Institute, United States of America; Dr B.G. Heydecker, University College, London, U.K.; K. Kahkonen, Technical Research Centre of Finland, Espoo, Finland; A.I. Khan, Heriot-Watt University, Edinburgh, U.K.; Dr B. Knight, The University of Greenwich, London, U.K.; Dr V.K. Koumoussis, National Technical University of Athens, Greece; Professor C.S. Krishnamoorthy, Indian Institute of Technology - Madras, India; Dr B. Kumar, University of Strathclyde, Glasgow, U.K.; J. Lansdown, Middlesex Polytechnic, U.K.; Professor K.H. Law, Stanford University, United States of America; Professor K.L. Lawrence, The University of Texas at Arlington, United States of America; Professor Liu Xihui, China Academy of Electronics & Information Technology, Beijing, P R China; Professor I.A. MacLeod, University of Strathclyde, Glasgow, U.K.; Professor M.L. Maher, University of Sydney, Australia; Dr J. Miles, University of Wales, Cardiff, U.K.; Dr S.G. Ritchie, University of California, Irvine, United States of America; Dr S. Rowlinson, Hong Kong University; Dr G.G. Roy, The University of Western Australia, Australia; Dr H.C. Shah, Stanford University, United States of America; Dr C.-K. Soh, Nanyang Technological Institute, Singapore; Dr W.J. Spencer, Swinburne Institute of Technology, Australia; Professor D. Sriram, Massachusetts Institute of Technology, Cambridge, United States of America; Professor G. Yagawa, University of Tokyo, Japan; and Dr K. Zreik, Association EuropIA, Paris, France.

Finally, I should like to thank the other members of the Heriot-Watt University's *Structural Engineering Computational Technology Research Group* in particular: Asad Khan, János Sziveri, Jørgen Stang, Ardeshir Bahreininejad, João P. de Barros Leite and Janet Wilson.
