❖CONTENTS❖

1. INFORMATION TECHNOLOGY: PRESENT AND FUTURE

- 1.1 THE PENETRATION OF INFORMATION TECHNOLOGIES INTO CIVIL AND STRUCTURAL ENGINEERING DESIGN: STATE-OF-THE-ART AND DIRECTIONS TOWARD THE FUTURE, S.J. Fenves, Department of Civil and Environmental Engineering, Carnegie-Mellon University, Pittsburgh, United States of America..... 1
- 1.2 INFORMATION TECHNOLOGY IN CIVIL AND STRUCTURAL ENGINEERING DESIGN: TAKING STOCK TO 1996, D.E. Grierson, Department of Civil Engineering, University of Waterloo, Waterloo, Ontario, Canada..... 7
- 1.3 DESIGN TOOLS THAT LEARN: A POSSIBLE CAD FUTURE, J.S. Gero, Key Centre of Design Computing, Department of Architectural and Design Science, The University of Sydney, Sydney, Australia..... 17

2. CONCEPTUAL DESIGN

- 2.1 INTERACTIVE DESIGN - TIME TO BITE THE BULLET, I.F.C. Smith, Artificial Intelligence Laboratory, Computer Science Department, Federal Institute of Technology, Lausanne, Switzerland.....23
- 2.2 A FUNCTIONAL APPROACH IN ARCHITECTURAL CAD: ARCHIPLAN, B.Medjdoub and B. Yannou, Laboratoire Productique Logistique, Ecole Central de Paris, France31
- 2.3 DEVELOPMENT OF THE VK.EXPERT SYSTEM FOR COMPUTER-AIDED PRELIMINARY DESIGN OF REINFORCED CONCRETE BUILDINGS, C.A. Syrmakzsis, G.K. Mikroudis and S. Rouvas, Institute of Structural Analysis and Aseismic Research, National Technical University of Athens, Athens, Greece.....45
- 2.4 MULTI-AGENT COLLABORATIVE CASE-BASED ESTIMATING AND DESIGN IN NIRMANI: ORGANISING A MULTI-PERSPECTIVE CASE MEMORY, S. Perera and I.D. Watson, , Department of Surveying, University of Salford, United Kingdom53

3. ANALYTICAL MODELLING

- 3.1 TOWARDS AN INTEGRATED ARCHITECTURE FOR THE STRUCTURAL ANALYSIS OF MECHANICAL STRUCTURES, L. Remondini, J.C. Leon and P. Trompette, Soils, Solids, Structures Laboratory, Domaine Universitaire, Grenoble, France..... 65
- 3.2 KNOWLEDGE BASED APPROACH TO THE DESIGN OF STRUCTURAL STEEL JOINTS, H. Heinisuo and J. Hyvarinen, Finnish Academy, Tampere University of Technology, Finland75
- 3.3 AN OBJECT ORIENTED MODEL FOR THE REPRESENTATION OF KNOWLEDGE TO DEVELOP COMPUTATIONAL VERIFICATION SYSTEMS, P. Holewik and D. Hartmann, Institute of Computational Engineering, Ruhr-University of Bochum, Germany87

4. BRIDGE DESIGN

- 4.1 A DECISION SUPPORT SYSTEM FOR THE CONCEPTUAL DESIGN OF RIVER BRIDGES, N. Clayton, J.C. Miles and C.J. Moore, School of Engineering, University of Wales, Cardiff, United Kingdom.....97

4.2 DEVELOPMENT OF AN INFORMATION MODEL FOR A GEOGRAPHICAL INFORMATION-BASED (GIS) BRIDGE MANAGEMENT SYSTEM (BMS), T.H. She and G. Aouad, Department of Surveying, University of Salford, United Kingdom	103
4.3 COMPUTATIONAL SUPPORT FOR THE DESIGN AND COSTING OF BRIDGE FOUNDATIONS, J.V. Cadogan, C.J. Moore and J.C. Miles, School of Engineering, University of Wales, Cardiff, United Kingdom.....	113
5. CODES OF PRACTICE	
5.1 A DEPENDENCY NETWORK GENERATOR FOR STANDARDS PROCESSING, A.I. Neilson, Department of Civil Engineering, University of Strathclyde, United Kingdom.....	121
5.2 USING HTML DOCUMENTS AS AN EXPLANATION FACILITY TOOL IN CIVIL ENGINEERING SOFTWARE, K. Lehner and D. Hartmann, Institute of Computational Engineering, Ruhr-University of Bochum, Germany.....	127
5.3 A STANDARDS PROCESSING FRAMEWORK, H. Kiliccote, J.H. Garrett and S.J. Fenves, Department of Civil and Environmental Engineering, Carnegie-Mellon University, Pittsburgh, United States of America.....	133
6. SPECIAL APPLICATIONS	
6.1 TOWARDS COMPUTATIONAL ECO-ANALYSIS OF BUILDING DESIGNS, A. Mahdavi and R. Ries, Department of Architecture, Carnegie Mellon University, Pittsburgh, United States of America	141
6.2 UTILISATION OF GIS AND NETWORK ANALYSIS FOR EARTHQUAKE DAMAGE ASSESSMENT OF TRANSPORTATION SYSTEMS, N. Basoz, S.A. King, A.S. Kiremidjian and K.H. Law, Civil Engineering Department, Stanford University, United States of America	151
6.3 DESIGN METHODOLOGY AND DATA ARCHITECTURE FOR THE DESIGN OF TEXTILE STRUCTURES, P. Veron*, J.C. Leon* and P Trompette#, *Laboratoire des Sols, Solides, Structures UMR-CNRS 5521, Grenoble, France, # Laboratoire de Mecanique des Materiaux, des Sols et des Structures, Universite Claude Bernard, France.....	161
6.4 CONSTRAINT-BASED GENETIC ALGORITHM OPTIMIZATION APPLIED TO REINFORCED CONCRETE DESIGN, W.K. Lucas and W.M.K. Roddis, Civil and Environmental Engineering Department, University of Kansas, Lawrence, United States of America.....	171
7. EMERGING TECHNOLOGIES	
7.1 VIRTUAL REALITY IN AN INTEGRATED CONSTRUCTION ENVIRONMENT, I. Faraj and M. Alshawi, Department of Surveying, University of Salford, United Kingdom.....	177
7.2 RETROFIT DESIGN VERIFICATION VIA IN-SERVICE MONITORING OVER THE INTERNET: A CASE STUDY, S.S. Chen and C.M. Ballard, , Civil Engineering Department, State University of New York, Buffalo, United States of America.....	183
8. GENETIC ALGORITHMS AND NEURAL NETWORKS	
8.1 THE ADAPTATION OF STRUCTURAL SYSTEM DESIGNS USING GENETIC ALGORITHMS, M.L. Maher and A.G. de Silva Garza, Key Centre of Design Computing, Department of Architectural and Design Science, University of Sydney, Sydney, Australia.....	189

8.2 PARALLEL PROCESSING, NEURAL NETWORKS AND GENETIC ALGORITHMS: REVISITED, B.H.V. Topping, J. Sziveri, A. Bahreininejad, J.B.P. Leite and B. Cheng, Department of Mechanical and Chemical Engineering, Heriot-Watt University, Edinburgh, United Kingdom.....	197
8.3 USING NEURAL NETWORKS TO SIMULATE POORLY UNDERSTOOD ENGINEERING PROCESSES, I. Flood, Department of Civil Engineering, University of Maryland, United States of America.....	219
8.4 A MULTICRITERIA GENETIC ALGORITHM TO SOLVE OPTIMIZATION PROBLEMS IN STRUCTURAL ENGINEERING DESIGN, S. Kundu, Department of Human and Mechanical Systems Engineering, Kanazawa University, Kanazawa, Japan.....	225
9. KNOWLEDGE-BASED SYSTEMS	
9.1 DEVELOPMENT OF A KNOWLEDGE-BASED SYSTEM FOR PLANNING SOIL EXPLORATION PROGRAMMES USING A PROBABILISTIC APPROACH, H.T. Fung and J.N. Kay, Department of Civil and Structural Engineering, The University of Hong Kong, Hong Kong.....	235
9.2 AN EXPERT SYSTEM FOR DESIGNING BAR-MESH MODULES OF REINFORCED CONCRETE STRUCTURES - AUREMSYS, J.-J. Kim*, J.-H. Kim*, D.-Y. Lee*, K.-H. Lee*, K.-R. Kim# and S.-J. Hong**, * Department of Architectural Engineering, Hanyang University, Seoul, Korea, #Construction and Economy Research Institute of Korea, Seoul, Korea and **Sunkyong Engineering and Construction Co., Seoul, Korea.....	241
9.3 A KNOWLEDGE-BASED SYSTEM APPROACH FOR CODE CHECKING OF CROSS-SECTIONS IN STEEL STRUCTURES ACCORDING TO EUROCODE 3, J. de Gelder and M. Steenhuis, TNO Building and Construction Research, The Netherlands.....	253
9.4 KNOWLEDGE BASED SYSTEMS APPLIED TO REAL-TIME STRUCTURAL MONITORING, A. Goodier and S. Matthews, Structural Performance Division, Building Research Establishment, Watford, United Kingdom.....	263

❖PREFACE❖

This volume contains some of the papers presented at the *International Conference on Information Technology in Civil & Structural Engineering Design - Taking Stock and Future Directions* held between August 14 and 16, 1996 at the University of Strathclyde, Glasgow, Scotland. This conference was part of the bi-centennial celebrations of the University of Strathclyde. We live in an information age and the use of Information Technology in Civil and Structural Engineering is expanding so rapidly that the community needs to investigate its implications much more seriously. The pace of developments in Information Technology is simply breathtaking and one of the ways once could keep up with it is by sharing the experiences of others. This conference provided one such forum for sharing experiences in both practice of and research in Information Technology for Civil and Structural Engineering Design.

All the papers presented at this conference are contained in three volumes. Other papers presented at this conference are published in:

- Information Representation and Delivery in Civil and Structural Engineering Design, B. Kumar and A. Retik, (Editors)
Civil-Comp Press, 1996, ISBN 0-948749-38-5
- Information Technology in Civil and Structural Engineering Design, B. Kumar, I.A. MacLeod and A. Retik, (Editors),
Inverleith Spottiswoode, 1996, ISBN 1-900957-00-0

The papers published in *Information Technology in Civil and Structural Engineering Design* are short contributions to the conference. Papers in this volume and *Information Representation and Delivery in Civil & Structural Engineering Design* are long contributions and were reviewed by at least two reviewers. Over one hundred and three papers were submitted for publication in these two volumes and some forty-nine of them were finally selected for publication after the peer review process. In addition, these two volumes also include the keynote and four other invited contributions as well as Professor Steven Fenves special lecture at the conference. These volumes represent contributions from over thirty countries on various topics. The topics covered in this volume are:

- Analytical Modelling
- Bridge Design
- Codes of Practice
- Conceptual Design
- Special Applications
- Emerging Technologies
- Genetic Algorithms and Neural Networks
- Knowledge-Based Systems

I believe that the three volumes present a state-of-the-art report on Information Technology applications in Civil and Structural Engineering Design and should be a useful reference material for many researchers, students as well as practitioners in this area.

I should like to thank all the authors who submitted papers to the conference. I should also like to thank all the reviewers who took time out of their busy schedules to review papers for the conference. Special thanks go to Professor Barry Topping of Heriot-Watt University who provided the main inspiration and support for the conference.

Bimal Kumar
