❖CONTENTS❖

1 COMPUTATIONAL MECHANICS

- 1.1 EFFICIENT AND LOCKING FREE ANISOTROPIC PLATE AND SHELL TRIANGULAR ELEMENTS, J.Argyris and L. Tenek, Institute for Computing Applications, University of Stuttgart, Germany 1

2 BUCKLING AND STABILITY ANALYSIS

- 2.1 COMPUTATIONAL STRUCTURAL STABILITY, W B Krätzig, Research Centre for Structural Dynamics, Ruhr-University Bochum, Germany21
- 2.2 BUCKLING CHARACTERISTICS OF SINGLE LAYER LATTICED DOMES UNDER EQUIPMENT LOADING, H.M. Jung*, Y.H. Kwon# and M. Yamada+, *Institute of Construction Technology, Daedong Co., Seoul, Korea, #Kyung-Pook National University, Taegu, Korea, +Tohoku University, Aoba, Sendai, Japan.....33
- 2.3 LOCATION OF BIFURCATION POINTS AND BRANCHING ANALYSIS IN GENERALIZED COORDINATES, K.A. Lazopoulos, Engineering Sciences Department, Section of Mechanics, National Technical University of Athens, Athens, Greece41
- 2.4 FINITE ELEMENT ANALYSIS OF TUBE STABILITY IN DEEP WATER, J.L. Tassoulas, S.A. Karamanos, A.C. Nogueira and G. Mansour, Department of Civil Engineering, The University of Texas at Austin, Austin, United States of America45
- 2.5 NONLINEAR INTERACTIVE BUCKLING SOLVED BY FEM, O. Roth and J. Ravinger, Technical University of Kosice, Slovakia.....61
- 2.6 COMPUTING AND EXPERIMENTING IN BUCKLING, C.M. Menken, G. Schreppers, W.J. Groot and R. Petterson, Eindhoven University of Technology, The Netherlands69

3 DYNAMIC STABILITY ANALYSIS

- 3.1 QUALITATIVE CRITERIA IN NONLINEAR DYNAMIC BUCKLING AND STABILITY OF AUTONOMOUS DISSIPATIVE SYSTEMS, A.N. Kounadis, Department of Civil Engineering, National Technical University of Athens, Athens, Greece77
- 3.2 ON KINEMATIC INSTABILITY PHENOMENA OF ELASTO-PLASTIC SHELL STRUCTURES, P. Nawrotzki, W.B. Krätzig and U. Montag, Institute for Statics and Dynamics, Ruhr University Bochum, Bochum, Germany83
- 3.3 DAMPING INFLUENCE OF SIMPLE SHELL-LIKE SHALLOW MODELS TO DYNAMIC BUCKLING, S-D. Kim*, M.M. Kang#, T.J. Kwun* and Y. Hangai+, *Department of Architectural Engineering, Sung-Kyun-Kwan University, Suwon, Korea, #Department of Architectural Engineering, Kyung Pook National University, Taegu, Korea, +I.I.S., University of Tokyo, Tokyo, Japan99

4 APPLICATION OF GROUP THEORY

- 4.1 SYMMETRY AND THE DIRECT STIFFNESS METHOD IN STRUCTURAL ANALYSIS: A

FORMULATION BASED ON GROUP THEORY, A. Zingoni*, M.N. Pavlovic# and G.M. Zlokovic**,
 *Department of Civil Engineering, University of Zimbabwe, Harare, Zimbabwe, #Department of Civil
 Engineering, Imperial College, London, United Kingdom, **Faculty of Architecture, University of
 Belgrade, Belgrade, Yugoslavia 107

5 OPTIMIZATION FOR COMPUTATIONAL MECHANICS

- 5.1 SUPERPOSITION IN STRESS - UNILATERAL CABLE STRUCTURES, C.D. Bisbos, Institute for
 Steel Structures, Department of Civil Engineering, Aristotle University, Thessaloniki, Greece 117
- 5.2 A NEW METHOD FOR THE NUMERICAL TREATMENT OF HEMIVARIATIONAL
 INEQUALITIES E.S. Mistakidis and P.D. Panagiotopoulos, Institute of Steel Structures, Department of
 Civil Engineering, Aristotle University, Thessaloniki, Greece 123
- 5.3 CORRECTIVE STRESS DISTRIBUTION IN ABOVE-GROUND PIPELINES DUE TO THE
 PRESENCE OF FRICTION ON THE SADDLE INTERFACES, C.C. Baniotopoulos and P.D.
 Panagiotopoulos, Institute of Steel Structures, Department of Civil Engineering, Aristotle University,
 Thessaloniki, Greece 131

6 DYNAMIC ANALYSIS

- 6.1 DYNAMIC STIFFNESS ANALYSIS IN FREE VIBRATION OF TOROIDAL SHELL, A.Y.T. Leung
 and N.T.C. Kwok, Department of Civil & Structural Engineering, University of Hong Kong, Hong Kong
 139
- 6.2 SPACE FLIGHT DYNAMIC SIMULATIONS USING FINITE ELEMENT RESULTS IN
 MULTIBODY SYSTEM CODES, O. Wallrapp* and D. Sachau#, *FB Feinwerktechnik,
 Fachhochschule Munich, Germany, #Institute Robotics and System Dynamics, German Aerospace
 Research Establishment (DLR), Wessling, Germany 149
- 6.3 RAYLEIGH-RITZ ANALYSIS OF GENERALLY ORTHOTROPIC COMPOSITE PLATES ON
 WINKLER FOUNDATIONS, P. Venini and C. Mariani, Dipartimento di Meccanica Strutturale,
 Universita di Pavia, Pavia, Italy 159
- 6.4 VIBRATION AND STABILITY MODES OF LONG FLEXIBLE STRUCTURES, E.M. Daya and M.
 Potier-Ferry, Lab de Physique et Mec des Materiaux, URA CNRS 1215, Inst Supérieur de Genie
 Mecanique et Productique, Universite de Metz, Ile de Saulcy, Metz, France 171
- 6.5 THE USE OF MULTIBODY DYNAMICS IN THE SIMULATION OF STRUCTURAL RESPONSES
 TO EARTHQUAKES, D. Neuenhaus and G. Sedlacek, Lehrstuhl für Stahlbau der RWTH, Aachen,
 Germany 179
- 6.6 INCOMPATIBLE THREE-DIMENSIONAL DYNAMIC FINITE ELEMENT METHOD, G.J. He* and
 D.P. Chen#, *Civil Engineering Department, Changsha Railway University, Changsha, Hunan, P.R.
 China, #Scientific Research Office, Southwest Jiao Tong University, Chengdu, Sichuan, P.R. China 185
- 6.7 ON LAGRANGIAN APPROACH TO THE DYNAMICS OF SUPERIMPOSED
 BLOCKSTRUCTURES, A. Ercolano, Dipartimento di Ingegneria Industriale, Università di Cassino,
 Cassino, Italy 191
- 6.8 MODAL ANALYSIS OF STRUCTURES BY HIGH-ORDER MULTIVARIATE AUTOREGRESSIVE

MODEL, X. He* and G. De Roeck#, *Northern Jiaotong University, China, #Katholieke Universiteit Leuven, Belgium199

7 DYNAMIC SENSITIVITY ANALYSIS AND RE-ANALYSIS

- 7.1 NUMERICAL METHODS FOR DYNAMIC RE-ANALYSIS OF STRUCTURES WITH LOCALIZED MODIFICATIONS, K.H. Law+, C.M.M. Carey*, D.R. Mackay** and G.H. Golub#, +Department of Civil Engineering, Stanford University, Terman Engineering Center, Stanford, United States of America, *Center for Research on Parallel Computation, California Institute of Technology, United States of America, **Intel Corporation, Oak Ridge National Laboratory, Oak Ridge, United States of America, #Department of Computer Science, Stanford University, Stanford, United States of America207
- 7.2 SENSITIVITY ANALYSIS OF STEADY-STATE RESPONSE OF PARAMETRIC SYSTEMS, Z. Wójcicki, Technical University of Wrocław, Institute of Civil Engineering, Wrocław, Poland215

8 EIGENSOLVERS

- 8.1 GRADIENT EIGENANALYSIS ON NESTED FINITE ELEMENTS, L. Bergamaschi, G. Gambolati, G. Pini and M. Putti, Dipartimento di Metodi e Modelli Matematici per le Scienze Applicate, Università degli Studi di Padova, Padova, Italy225
- 8.2 VIBRATION OF ANTISYMMETRIC LAMINATED PLATES USING EIGENSENSITIVITY ANALYSIS, O.Barton* and R. Reiss#, *Department of the Navy, United States Naval Academy, Annapolis, United States of America, #Department of Mechanical Engineering, Howard University, Washington, United States of America239
- 8.3 IMPLEMENTATION AND PERFORMANCE OF ARNOLDI AND LANCZOS EIGENSOLVERS IN GALERKIN-FINITE ELEMENT COMPUTATIONS, D. Papadopoulos*, C. Siettos*, A.G. Boudouvis* and A.T. Chronopoulos#, *Department of Chemical Engineering, National Technical University of Athens, Athens, Greece #Department of Computer Science, University of Minnesota, Minneapolis, United States of America253

9 BOUNDARY ELEMENT METHODS

- 9.1 BOUNDARY ELEMENT ANALYSIS OF TRANSIENT THERMAL STRESSES IN VISCOELASTIC MATERIALS, S.S. Lee, Y.S. Sohn and S.H.Park, KAERI, Mechanical Systems Engineering Department, Taejon, South Korea263
- 9.2 SOLVING THE ELASTOSTATIC PROBLEM BY THE ANALOG EQUATION METHOD, J.T. Katsikadelis and C.B. Kandilas, Institute for Structural Analysis & Aseismic Research, National Technical University of Athens, Athens, Greece269
- 9.3 NUMERICAL ANALYSIS OF PLATE-SOIL INTERACTION, J. Batista de Paiva* and R. Butterfield#, *São Carlos Civil Engineering School, Structures Department, São Carlos, SP-Brasil, #Civil Engineering Department, Southampton University, Southampton, United Kingdom275
- 9.4 DYNAMIC ANALYSIS OF GENERALIZED VISCOELASTIC SYSTEMS WITH THE BOUNDARY ELEMENT METHOD, N. Makris*, G.F. Dargush# and M.C. Constantinou#, *Department of Civil Engineering & Geological Sciences, University of Notre Dame, Notre Dame, United States of America, #Department of Civil Engineering, SUNY Buffalo, Buffalo, United States of America283

9.5 ADAPTIVE DISCRETISATION FOR THE BOUNDARY INTEGRAL EQUATION METHOD IN ELASTICITY AND ELASTOPLASTICITY, E. Astrinidis and R.T. Fenner, Department of Mechanical Engineering, Imperial College, London, United Kingdom.....	291
9.6 FATIGUE CRACK GROWTH STUDIES USING DUAL BOUNDARY ELEMENT METHOD, H. Nguyen-Dang* and A.M. Yan#, *LTAS-Fracture Mechanics, University of Liège, Belgium, #Department of Mechanics Engineering, Nanjing Institute of Chemical Technology, China.....	301
9.7 LIMITING PROCEDURES AND CALCULATION OF BOUNDARY STRESSES IN THREE DIMENSIONAL BOUNDARY ELEMENT METHOD, C. Fiedler and L. Gaul, Institute A of Mechanics, University of Stuttgart, Stuttgart, Germany.....	311
9.8 THE BEM ON STRESS CONCENTRATION REDUCTION IN VISCOPLASTIC PLATES, C.P. Providakis and D.A. Sotiropoulos, Department of Engineering Sciences, Technical University of Crete, Chania, Greece.....	323
9.9 SHEAR STRESS CONCENTRATION IN HOLLOW PINS, D.W. Begg*, A.J. Gumienny#, M.A. Devane* and D.N. Gratton#, *School of Civil Engineering, University of Portsmouth, Portsmouth, United Kingdom, #School of Mathematical Studies, University of Portsmouth, Portsmouth, United Kingdom.....	329
9.10 TRANSIENT RESPONSE ANALYSIS OF ELASTO-PLASTIC PLATES IN BENDING BY BOUNDARY ELEMENTS, C.P. Providakis+ and D.E. Beskos*, +Department of Engineering Sciences, Technical University of Crete, Chania, Greece, *Department of Civil Engineering, University of Patras, Patras, Greece	335
 10 FINITE DIFFERENCE METHODS	
10.1 ACCURACY INCREASE OF FINITE DIFFERENCE CALCULATIONS BY MEANS OF DIFFERENTIATION OF THE PARTIAL DIFFERENTIAL EQUATIONS AND THE BOUNDARY CONDITIONS, M. Arad, R. Segev and G. Ben-Dor, Department of Mechanical Engineering, Ben-Gurion University of the Negev, Beer-Sheva, Israel	343
 11 STOCHASTIC PROCESSES AND MECHANICS	
11.1 DIGITAL SIMULATION OF RANDOM FIELDS FOR STRUCTURAL APPLICATIONS, E. Bielewicz, J. Górski and H. Walukiewicz, Technical University of Gdansk, Department of Civil Engineering, Gdansk, Poland	353
11.2 ON SOME STOCHASTIC EIGENVALUE PROBLEMS FOR TECHNICAL APPLICATIONS, H. Grundmann, F. Duddeck and H. Waubke, Lehrstuhl für Baumechanik, Technical University of Munich, Germany	361
11.3 AN ALTERNATIVE APPROACH FOR TIME DEPENDENT STRUCTURAL SYSTEM RELIABILITY, C.Q. Li, CSIRO, Division of Building, Construction and Engineering, Melbourne, Australia	369

❖PREFACE❖

This volume contains some of the papers presented at The Second International Conference on Computational Structures Technology which was held in Athens from the 30th August to 1st September 1994. Other papers from the conference are published in:

- Advances in Parallel and Vector Processing for Structural Mechanics, Civil-Comp Press, 1994, ISBN 0-948-749-22-9
- Advances in Post and Pre-Processing for Finite Element Technology, Civil-Comp Press, 1994, ISBN 0-948-749-23-7
- Advances in Finite Element Techniques, Civil Comp Press, 1994, ISBN 0-948-749-24-5
- Advances in Simulation and Interaction Techniques, Civil-Comp Press, 1994, ISBN 0-948-749-25-3
- Advances in Non-Linear Finite Element Methods, Civil-Comp Press, 1994, ISBN 0-948-749-26-1
- Advances in Structural Optimization, Civil-Comp Press, 1994, ISBN 0-948-749-27-X
- Artificial Intelligence and Object Oriented Approaches to Structural Engineering, Civil-Comp Press, 1994, ISBN 0-948-749-29-6
- Computational Structural Engineering for Practice, Civil-Comp Press, 1994, ISBN 0-948-749-30-X
- Advances in Structural Engineering Computing, Civil-Comp Press, 1994, ISBN 0-948-749-31-8

We should like to thank all the authors for their contribution and in particular those who personally presented their papers in Athens. We should also like to thank the members of the Conference Editorial Board and the National Greek Advisory Board.

The members of the CST94 National Greek Advisory Board were: Professor DE Beskos, Patras; Professor J Katsikadelis, Athens; Professor A Kounadis, Athens; Professor A Liolios, Thrace; Professor P Panagiotopoulos, Thessaloniki; Professor G Tsamasphyros, Athens; and Professor J Vardoulakis, Athens.

The members of the CST94 Conference Editorial Board were: Professor A Armenakas, USA; Professor KJ Bathe, USA; Professor P Beckers, Belgium; Professor M Bendsoe, Denmark; Professor PG Bergan, Norway; Dr L Berke, USA; Professor M Bernadou, France; Dr JF Besseling, The Netherlands; Professor RI Borja, USA; Dr S Bostic, USA; Dr John W Bull, UK; Professor Cheng Gengdong, China; Professor Chang-Koon Choi, South Korea; Professor C Cinquini, Italy; Dr L Demkowicz, Poland; Dr PRB Devloo, Brazil; Professor I St Doltsinis, Germany; Professor J Donea, Italy; Professor I S Duff, UK and France; Dr A Eriksson, Sweden; Professor C Farhat, USA; Professor JE Flaherty, USA; Professor C Fleury, Belgium; Professor D Frangopol, USA; Professor RH Gallagher, USA; Professor G Gambolati, Italy; Professor L Gaul, Germany; Professor M Geradin, Belgium; Professor DE Grierson, Canada; Professor KK Gupta, USA; Professor P Hajela, USA; Professor E Hinton, UK; Professor M Hogge, Belgium; Dr PK Jimack, UK; Professor J Jirousek, Switzerland; Professor BL Karihaloo, Australia; Dr AI Khan, UK; Professor N Kikuchi, USA; Professor U Kirsch, Israel; Professor Dr M Kleiber, Poland; Professor S Kobayashi, Japan; Professor W B Kratzig, Germany; Professor YA Kuznetsov, Russia; Professor P Ladeveze, France; Professor K L Lawrence, USA; Dr SH Lee, USA; Professor P Leger, Canada; Professor AYT Leung, Hong Kong; Professor WK Liu, USA; Dr R K Livesley, UK; J Mackerle, Sweden; Professor G Maier, Italy; Dr J Malone, USA; Professor J Mandel, USA; Professor IM May, UK; Dr JJ McKeown, UK; Professor J L Meek, Australia; Dr DT Nguyen, USA; Professor A K Noor, USA; Dr B Nour-Omid, USA; Dr R Ohayon, France; Professor DRJ Owen, UK; Professor PY Papalambros, USA; Dr F Papp, Hungary; Professor KC Park, USA; Professor D Parsons, USA; Professor MS Pereira, Portugal; Professor J Periaux, France; Dr KG Prasad, USA; Professor E Ramm, Germany; Professor JN Reddy, USA; Dr LM Ribeiro, Portugal; Professor

JR Rice, USA; Professor E Riks, The Netherlands; Professor G De Roeck, Belgium; Professor G Rozvany, Germany; Professor A Samartin, Spain; Professor B Schrefler, Italy; Professor K Schweizerhof, Germany; Professor MS Shephard, USA; Professor Naruhito Shiraishi, Japan; Dr HD Simon, USA; Professor P Spanos, USA; Professor Dr Ing H Stein, Germany; Dr O Storaasli, USA; Professor KS Surana, USA; Professor P le Tallec, France; Professor G Thierauf, Germany; Dr G Vanderplaats, USA; Dr VB Venkayya, USA; Professor K S Viridi, UK; Dr M Walker, France and USA; Professor N-E Wiberg, Sweden; Dr JF Williams, Australia; Professor EL Wilson, USA; Professor W Wunderlich, Germany; Professor Yong Bin Yang, Taiwan; and Dr T Zimmermann, Switzerland,

This conference would not have been possible without the assistance of many people and their organisation. In particular, we should like to thank the sponsors: The Greek Association for Computational Mechanics (GRACM); The Greek Ministry of Culture; The General Secretariat of Research and Technology of Greece; The Tourist Organisation of Greece; The National Technical University of Athens; The University of Patras; The Democritus University of Thrace; The Evgenidis Foundation; and UNISYS Hellas.

The assistance of: the members of the Structural Engineering Computational Technology Research Group at Heriot-Watt University, Edinburgh; and the staff of the Institute of Structural Analysis and Aseismic Research, National Technical University of Athens is gratefully acknowledged. In particular, we wish to thank Dr Asad I Khan for his help during the early stages of the preparation of this conference.

We should particularly like to thank Professor Dimitri Beskos, President of the GRACM, for all the help he has given us during the planning and organisation of the conference.

We also wish to thank all at Civil-Comp Press for their help and perserverance in the realisation of this conference in particular: Maisie Sales and Szandra Köves. Finally we should both like to thank our research assistants in Edinburgh and Athens for their help and assistance during the editing and preparation of these conference proceedings. Without their help during the months leading up to this conference life would have been considerably more difficult and duller. In particular we should mention János Sziveri, Biao Cheng, Péter Iványi, Yannis Tsompanakis, Prodrómos Psaropoulos and Nick Lagaros.

Manolis Papadrakakis and Barry Topping
July 1994
