◦ CONTENTS ◦

**1 FINITE ELEMENT ANALYSIS: STUDIES**

1.1	FINITE ELEMENT MODELLING OF SEWER LININGS, M.N. Pavlović†, S. Arnaout† and D. Hitchings§, †Department of Civil Engineering, §Imperial College of Science, Technology & Medicine, London, England, †Burns & McDonnell International, United States of America . . . . .	1
1.2	A STUDY OF THE RESPONSE OF AN UNBONDED SANDWICH PANEL TO AN IMPACT LOAD USING FINITE ELEMENT MODELS, F.L. Wong, School of Civil Engineering, University of Herfordshire, Hatfield, Hertfordshire . . . . .	13
1.3	THREE DIMENSIONAL FINITE ELEMENT ANALYSIS OF DUAL SKIN COMPOSITE STRUCTURES, A.D. Jefferson† and H.D. Wright‡, †Sir Alexander Gibb & Partners, (formerly seconded to University of Wales College of Cardiff), ‡Department of Civil Engineering, University of Strathclyde, Glasgow . . . . .	19
1.4	FINITE ELEMENT ANALYSIS OF ACCUMULATED STRESSES DUE TO DEAD WEIGHT IN RCC DAMS, C. Du† and G. Liu‡, †Institut für Wasserbau und Kulturtechnik, Universität Karlsruhe, Germany, ‡Hydraulic Engineering Department, Tsinghua University, Beijing, P.R. China . . . . .	33
1.5	FINITE ELEMENT STRESS ANALYSIS OF COMPOSITE SHAFTS OF VARIABLE CROSS-SECTION AND EXPERIMENTAL VALIDATION, M. Ozbay, Mechanical Engineering Department, Faculty of Engineering and Architecture, Gazi University, Maltepe, Ankara, Turkey . . . . .	39

**2 ANALYSIS AND DESIGN OF STEEL STRUCTURES**

2.1	INTEGRATED COMPUTER ANALYSIS AND DESIGN OF STEEL STRUCTURES, J.P. Papangelis and N.S. Trahair, School of Civil & Mining Engineering, The University of Sydney, Sydney, Australia . . . . .	45
2.2	DERIVED MOMENT ROTATION CURVES FOR PARTIALLY RESTRAINED CONNECTIONS, M.K. Elsalti and R.M. Richard, Department of Civil Engineering and Engineering Mechanics, University of Arizona, Tucson, Arizona, United States of America, . . . . .	55
2.3	OPTIMUM DESIGN OF STEEL FRAMES WITH TAPERED MEMBERS, M.P. Saka, Department of Civil Engineering, University of Bahrain, Isa Town, State of Bahrain . . . . .	63
2.4	OVERALL IMPERFECTION METHOD IN COMPUTER AIDED DESIGN OF BEAM-COLUMN STEEL STRUCTURES, F. Papp, Department of Steel Structures, Technical University of Budapest, Hungary . . . . .	81
2.5	GIRDER - SOFTWARE TO AUTOMATE CHECKING OF STIFFENED PLATE AND BOX GIRDERS TO BS 5400 Pt 3, D.J. Danson†, N.A. Adam† and J.R. Fraser‡, †SLP Engineering London, Uxbridge, Middlesex, England ‡AMEC Engineering Limited, Aberdeen, Scotland . . . . .	87
2.6	DESIGN OF STEEL ARCHES, J.P. Papangelis and N.S. Trahair, School of Civil & Mining Engineering, The University of Sydney, Sydney, Australia . . . . .	97

<b>3</b>	<b>ANALYSIS AND DESIGN REINFORCED CONCRETE BEAM STRUCTURES</b>	
3.1	LATERAL BUCKLING ANALYSIS OF R/C GIRDERS USING MULTIFIBER BEAM ELEMENTS, F.-J. Ulm†† and J.-L. Clément††§, †Laboratoire Central des Ponts et Chaussées, Paris, France, ‡GRECO Géomatériaux, §Laboratoire de Mécanique et Technologie, ENS Cachan, France . . . . .	103
3.2	DATA PROCESSING AND NUMERICAL MODELLING IN RESEARCH INTO MOMENT REDISTRIBUTION IN REINFORCED CONCRETE BEAMS, R.H. Scott, School of Engineering and Computer Science, University of Durham, Science Laboratories, Durham, England . . . . .	113
3.3	NUMERICAL AND ANALYTICAL INVESTIGATION OF SHEAR IN REINFORCED CONCRETE BEAMS SUBJECTED TO DYNAMIC LOADS, M.A. Iyengunmwena† and K.S. Viridi†, †Department of Civil Engineering, University of Leeds, Leeds, England, ‡Structures Research Centre, Department of Civil Engineering, City University, London, England . . . . .	123
3.4	ELASTIC DEFLECTION AND MOMENT REDISTRIBUTION OF RC CONTINUOUS BEAMS, W. El-Tahan† and S. Seleim†, †Structural Engineering Department, Cairo University, Guiza, Egypt, ‡Faculty of Engineering, Cairo University, Fayoum, Egypt . . . . .	135
3.5	DIRECT DESIGN FOR MULTIPLE LOAD CASES, P. Bhatt and J. Moussa, Department of Civil Engineering, University of Glasgow, Glasgow, Scotland . . .	145
3.6	BIAXIAL MOMENT INTERACTION OF IRREGULAR REINFORCED CONCRETE SECTIONS, A.A. Nassar, Department of Civil Engineering, Zagazig University, Cairo, Egypt . . . . .	157
<b>4</b>	<b>MODELLING OF REINFORCED CONCRETE STRUCTURES</b>	
4.1	MODELLING ASPECTS OF DYNAMIC CONCRETE PLASTICITY, O.O. Famiyesin †, N. Bicanic† and D.R.J. Owen†, Department of Civil Engineering, University of Glasgow, Glasgow, ‡Department of Civil Engineering, University College of Swansea, Swansea, Wales . . . . .	165
4.2	NON-LINEAR FINITE ELEMENT ANALYSIS IN OFFSHORE CONCRETE STRUCTURAL ENGINEERING COMPUTING, K. Waagaard, Veritec, Det Norske Veritas Industri Norge AS, Hovik, Norway . . . . .	179
4.3	AN IMPROVED INTERFACE ELEMENT FOR CRACKING OF STRUCTURAL CONCRETE, Zheng Ping Wu and J. Blaauwendraad, Faculty of Civil Engineering, Delft University of Technology, The Netherlands . . . . .	187
4.4	BEHAVIOUR OF A REINFORCED CONCRETE FLAT SLAB OVER THE COLUMN SUPPORT DESIGNED USING NONLINEAR STRESS FIELDS, P. Bhatt and A. Bensalem, Department of Civil Engineering, University of Glasgow, Glasgow, Scotland . . . . .	195
4.5	ANALYSIS OF REINFORCED CONCRETE AND METALLIC SILOS, S. Bouchend'Homme, J. Texereau and R. Souchet, Laboratoire de Mecanique Theorique, Universite de Poitiers, Poitiers, France, . . . . .	205

<b>5</b>	<b>ANALYSIS AND DESIGN OF CONCRETE PAVEMENTS</b>	
5.1	THE FINITE ELEMENT ANALYSIS OF PRECAST CONCRETE PAVEMENT UNITS AND THE LABORATORY VERIFICATION FOR AIRCRAFT OVER-RUNNING, J.W. Bull, Y.B. Luheshi and C.H. Woodford, Department of Civil Engineering, University of Newcastle upon Tyne, Newcastle upon Tyne, England	213
5.2	STRUCTURAL REHABILITATION OF ROAD PAVEMENTS: THE DEVELOPMENT OF A FINITE ELEMENT BASED OPTIMIZATION PROGRAMME, A.A. Sha'at, Department of Civil Engineering, Dundee Institute of Technology, Dundee, Scotland	221
<b>6</b>	<b>ANALYSIS OF DAMAGED STRUCTURES</b>	
6.1	APPLICATION OF ORTHOGONALISED LOAD-DEFLECTION STATES TO THE COLLAPSE BEHAVIOUR OF GROUT FILLED DAMAGED TUBULAR MEMBERS, A. Saleh and S. Parsanejad, School of Civil Engineering, University of Technology, Sydney, Australia	229
6.2	NON-LINEAR FINITE ELEMENT ANALYSIS OF REINFORCED CONCRETE MEMBERS AFFECTED BY ALKALI-AGGREGATE REACTION, H.X. Wen†, I.M. May† and R.J. Cope‡, †Department of Civil & Offshore Eng, Heriot-Watt University, Edinburgh, Scotland, ‡Faculty of Engineering, University of Plymouth, Plymouth, England	237
<b>7</b>	<b>SOIL- AND FLUID- STRUCTURE INTERACTION</b>	
7.1	EMPLOYMENT OF INFINITE ELEMENT IN DYNAMIC SOIL-STRUCTURE INTERACTION ANALYSIS, S. Samaan, A.Y. Akl and F.H. Sadek Structural Engineering Department, Faculty of Engineering, Cairo University, Cairo, Egypt	243
7.2	INTERFACE ELEMENT IN THREE DIMENSIONAL FINITE ELEMENT ANALYSIS OF SOIL-STRUCTURE INTERACTION, A. Y. Akl, Structural Engineering Department, Faculty of Engineering, Cairo University, Cairo, Egypt	253
7.3	DYNAMICS OF SUBMERGED SHELLS OF ARBITRARY GEOMETRY USING IMPROVED TRANSMITTING BOUNDARIES, N. Akkas and K. Tuncay, Department of Engineering Sciences, Middle East Technical University, Ankara, Turkey	265
7.4	SOIL-STRUCTURE INTERACTION ANALYSIS OF BUILDINGS USING STRONG MOTION ACCELEROGRAMS, M. Eetemaadi† and H. Hosseini‡, Department of Civil Engineering, Isfahan University of Technology, Isfahan, Iran †Building and Housing Research Center, Tehran, Iran	275
7.5	FINITE ELEMENT ANALYSIS OF FLOOR SLABS UNDER WARPING EFFECT, M. Al-Nasra, Civil Engineering Technology, Gaston College, South Dallas, United States of America	281

## 8 STABILITY AND POSTBUCKLING ANALYSIS

- 8.1 STABILITY ANALYSIS OF FRAMES WITH FLEXIBLE CONNECTIONS BY TRANSFER MATRICES, E.S. Kameshki† and S. Syngellakis‡, †Department of Civil & Architectural Engineering, University of Bahrain, ‡Department of Mechanical Engineering, University of Southampton, England . . . . . 289
- 8.2 ELASTIC BUCKLING ANALYSIS OF PALLET RACK STRUCTURES, X. Feng, M.H.R. Godley and R.G. Beale, School of Construction and Earth Science, Oxford Brookes University, Oxford, England . . . . . 297
- 8.3 MAJOR CONSIDERATIONS ON POSTBUCKLING ANALYSIS OF SPACE STRUCTURES, Yeong Bin Yang, Department of Civil Engineering, National Taiwan University, Taipei, Taiwan . . . . . 307

## 9 ANALYSIS AND DESIGN OF SPACE STRUCTURES

- 9.1 LARGE SPAN MULTILAYERED SPACEFRAME ROOFS, P. Kneen, Department of Structural Engineering, School of Civil Engineering, The University of New South Wales, Kensington, New South Wales, Australia . . . . . 313

## 10 ANALYSIS AND DESIGN OF CABLE STRUCTURES

- 10.1 ADAPTIVE CABLE STAYED ROOF SYSTEMS UNDER UPLIFT, P. Kneen, Department of Structural Engineering, School of Civil Engineering, The University of New South Wales, Kensington, New South Wales, Australia . . . . . 319
- 10.2 COMPUTER AIDED DESIGN OF ONE WAY CABLE SUPPORTED SPACEFRAME ROOFS UNDER GRAVITY LOADS, P. Kneen, Department of Structural Engineering, School of Civil Engineering, The University of New South Wales, Kensington, New South Wales, Australia . . . . . 325

## 11 DESIGN LOADINGS

- 11.1 SEMIACTIVE CONTROL OF FLOOR SYSTEMS, A. Ebrahimpour†, W.N. Patten‡, R.L. Sack§, A. Hamam§ and H.J. Shui†, †Department of Engineering, The Pennsylvania State University, Delaware County, United States of America, ‡School of Aerospace & Mechanical Engineering, University of Oklahoma, Norman, Oklahoma, United States of America §School of Civil & Environmental Engineering, University of Oklahoma, Norman, Oklahoma, United States of America . . . . . 329

## 12 ANALYSIS AND DESIGN OF FRAMES

- 12.1 DRIFT ANALYSIS OF FLEXIBLY LOADED FRAMES, T.H. Almusallam, Civil Engineering Department, King Saud University, Riyadh, Saudi Arabia . . . . . 339
- 12.2 OPTIMUM DESIGN OF FRAMES WITH VARIABLE CROSS SECTIONS UNDER STABILITY CONSTRAINTS, M.S. Hayalioglu† and M. Ulker‡, †Civil Engineering Department, University of Dicle, Diyarbakir, Turkey ‡Civil Engineering Department, University of Firat, Elazig, Turkey . . . . . 345

### 13 EARTHQUAKE ENGINEERING AND SEISMIC DESIGN

- 13.1 ANALYSIS OF SEISMICALLY EXCITED STRUCTURES USING A FINITE ELEMENT FRAGMENTATION ALGORITHM, D.L. Rice† and E.C. Ting‡, †Department of Civil Engineering, United States Air Force Academy, Colorado, United States of America, ‡School of Civil Engineering, Purdue University, West Lafayette, Indiana, United States of America . . . . . 355
- 13.2 ASSESSMENT OF SEISMIC RETROFIT TECHNIQUES FOR BRIDGE PIER WALLS, S.A. Mourad†, M.A. Haroun‡ and G.C. Pardoent‡, †Faculty of Engineering, University of Cairo, Egypt, ‡Department of Civil & Environmental Engineering, University of California, Irvine, United States of America . . . . . 365
- 13.3 OPTIMAL DESIGN OF STEEL FRAMES TO RESIST SEISMIC LOADS, A.M. Memari and M. Madhkhan, Sharif University of Technology, Department of Civil Engineering, Tehran, Iran . . . . . 371
- 13.4 OPTIMISING THE PERFORMANCE OF MULTI STOREY BUILDINGS SUBJECTED TO EARTHQUAKES, S.E. Nassiri, D.P. Thambiratnam and H.J.B. Corderoy, School of Civil Engineering, Queensland University of Technology, Brisbane, Queensland, Australia . . . . . 379

### 14 MASONRY STRUCTURES

- 14.1 COMPUTER ANALYSIS OF DRY-STONE WALLS USING DISTINCT ELEMENT CODE, J.G. Dickenst†, M.G. Mansell‡ and P.J. Walker§, †Department of Civil Engineering, University of Technology, Loughborough, Leicestershire, ‡Department of Civil Engineering, The University of Paisley, Glasgow, §Department of Civil Engineering, University of Zimbabwe, Harare, Zimbabwe . . . . . 385
- 14.2 THE EFFECT OF THE NUMBER OF MORTAR JOINTS ON THE STRENGTH OF MASONRY WALLS: AN ANALYTICAL INVESTIGATION, J. Morton†, M.D. Kotsovos‡, M.N. Pavlović§ and S.M. Seraj¶, †Lightwater, Surrey, England, ‡Faculty of Civil Engineering, National Technical University of Athens, Greece, §Department of Civil Engineering, Imperial College of Science and Technology, London, England, ¶Bangladesh University of Engineering & Technology, Dhaka, Bangladesh . . . . . 391

### 15 GRAPHICS AND INTERFACES

- 15.1 AN INTERACTIVE PRE-PROCESSOR WITH GRAPHIC INPUT FOR TALL BUILDING ANALYSIS, H.C. Chan, Y.K. Cheung and S.P. Shang, Department of Civil & Structural Engineering, University of Hong Kong, Hong Kong . . . . . 397
- 15.2 A DIFFERENT APPROACH TO THE DESIGN OF REINFORCED CONCRETE BUILDINGS, T. Isaković and M. Fischinger, Department of Civil Engineering, University of Ljubljana, Ljubljana, Slovenia . . . . . 403
- 15.3 ANIMATION OF GROUND SURFACE 3D MOVEMENTS DURING AN EARTHQUAKE, H. Hao, S.F. Yap, B.S. Bay and S.K. Kuan, School of Civil and Structural Engineering, Nanyang Technological University, Singapore . . . . . 409

**16 EDUCATION**

16.1 EXPERIENCES IN TEACHING TECHNICAL COMPUTING IN AN UNDERGRADUATE CIVIL ENGINEERING COURSE, P. Kneen, Department of Structural Engineering, School of Civil Engineering, The University of New South Wales, Kensington, New South Wales, Australia . . . . . 417

16.2 THE USE OF INTERACTIVE STRESS ANIMATION AS AN AID TO THE TEACHING OF STRUCTURAL ANALYSIS, A.G. Smyrell, School of Science & Technology, University of Teesside, Middlesbrough, Cleveland, England . . . . . 425

16.3 STRUCTURAL COMPUTING FOR BUILT ENVIRONMENT LEARNERS IN A CHANGING EDUCATIONAL ENVIRONMENT, M.R. Seden, School of the Built Environment, De Montfort University, Leicester . . . . . 431

## ◦ PREFACE ◦

This volume contains some of the papers presented at *CIVIL-COMP93*, The Fifth International Conference on Civil and Structural Engineering Computing and *Artificial Intelligence CIVIL-COMP93*, The Third International Conference in the Application of Artificial Intelligence to Civil and Structural Engineering. These conferences were held currently from 17th - 19th August 1993 at Heriot-Watt University, Edinburgh, Scotland. Other papers from these conferences are published in:

- Information Technology for Civil and Structural Engineers, Civil-Comp Press, (ISBN 0-948749-16-14)
- Knowledge Based Systems for Civil and Structural Engineering, Civil-Comp Press, (ISBN 0-948749-19-9)
- Developments in Civil and Construction Engineering Computing, Civil-Comp Press, (ISBN 0-948749-17-2)
- Developments in Computational Engineering Mechanics, Civil-Comp Press, (ISBN 0-948749-21-0)
- Neural Networks and Combinatorial Optimization in Civil and Structural Engineering, Civil-Comp Press, (ISBN 0-948749-18-0)

I should like to thank all the authors for their contribution and in particular those who travelled to Edinburgh to present their papers at the Conferences. I should also like to thank members of the Conference Advisory Boards for their assistance.

The members of the *CIVIL-COMP93* Conference Advisory Board were: Dr T.J.A. Agar, University of Glasgow, U.K.; Dr R.J. Allwood, University of Technology, Loughborough, U.K.; Dr M.R. Barnes, The City University, London, U.K.; Dr P. Bhatt, University of Glasgow, U.K.; Dr J.W. Bull, University of Newcastle upon Tyne, U.K.; Dr H.C. Chan, University of Hong Kong, Hong Kong; Professor Chang-Koon Choi, Korea Advanced Institute of Science and Technology, South Korea; Professor J Christian, University of Brunswick, Canada; Professor B.M. Das, Southern Illinois University at Carbondale, United States of America; Professor H. Eschenauer, University of Seigen, Germany; Professor D. Frangopol, University of Colorado at Boulder, United States of America; Professor J.A. Teixeira de Freitas, Universidade Tecnica de Lisboa, Portugal; Professor D.E. Grierson, University of Waterloo, Canada; Professor G. Guerlement, Faculte Polytechnique Mons, Belgium; Professor E. Hinton, University College of Wales, Swansea, U.K.; Professor K.C. Hover, Cornell University, United States of America; Professor A. Jennings, The Queen's University of Belfast, U.K.; Professor A. Kaveh, Iran University of Science and Technology, Iran; A.I. Khan, Heriot-Watt University, Edinburgh, U.K.; Professor U. Kirsch, Technion - Israel Institute of Technology, Israel, Dr R. Levy, Technion - Israel Institute of Technology, Israel; Professor I.A. MacLeod, University of Strathclyde, Glasgow, U.K.; Professor I. May, Heriot-Watt University, Edinburgh, U.K.; Professor R. McCaffer, University of Technology, Loughborough, U.K.; Professor J.L. Meek, University of Queensland, Australia; Professor R.E. Melchers, The University of Newcastle, Australia; Professor M. Papadrakakis, National Technical University of Athens, Greece; Dr F. Papp, Technical University of Budapest, Hungary; Dr M. Pavlovic, Imperial College, London, U.K.; Dr R. Powell, Brunel University, U.K.; Professor R. Richard, The University of Arizona, United States of America; Professor G. De Roeck, Katholieke Universiteit te Leuven, Belgium; Professor G. Rozvany, University of Essen, Germany; Professor R.L. Sack, University of Oklahoma, United States of America; Professor M.P. Saka, University of Bahrain, State of Bahrain; Professor A. Samartin, Mecanica de los Medios Continuos, Spain; Professor N. Shiraishi, Kyoto University, Japan; Professor L.M.C. Simoes, University of Coimbra, Portugal; Dr G. Singh, University of Leeds, U.K.; Dr T.D. Sloan,

The Queen's University of Belfast, U.K.; Dr D. Lloyd Smith, Imperial College, London, U.K.; Gordon Smyrell, University of Teesside, U.K.; Professor W.R. Spillers, New Jersey Institute of Technology, United States of America; Professor R.M. Stark, University of Delaware, United States of America; Professor H. Sugimoto, Muroran Institute of Technology, Japan; David Taffs, Ove Arup & Partners, London, U.K.; Professor A.B. Templeman, University of Liverpool, U.K.; Professor G. Thierauf, University of Essen, Germany; Dr D.G. Toll, University of Durham, U.K.; Professor N.S. Trahair, The University of Sydney, Australia; Dr G.J. Turvey, University of Lancaster, U.K.; Professor K.S. Viridi, The City University, London, U.K.; Dr S. Walker, National Rivers Authority, Warrington, U.K.; Dr A. Watson, Leeds University, U.K.; Dr F.L. Wong, University of Hertfordshire, U.K.; and Professor Yong Bin Yang, National Taiwan University Taipei, Taiwan.

The members of the *Artificial Intelligence CIVIL-COMP93* Advisory Board were: Dr M. Alshawi, University of Salford, U.K.; Professor T. Arciszewski, Wayne State University, United States of America; Dr E Balagurusamy, National Centre for Expert Systems, India; Dr R Beheshti, Delft University of Technology, The Netherlands; Professor D.I. Blockley, University of Bristol, U.K.; Dr D.A. Bradley, University of Lancaster, U.K.; Dr C. Burgoyne, University of Cambridge, U.K.; D. Chamberlain, The City University, U.K.; W.T. Chan, National University of Singapore; Dr T. Cornick, University of Reading, U.K.; Dr R. Coyne, The University of Sydney, Australia; Dr I.E.G. Davey-Wilson, Oxford Polytechnic, U.K.; Dr C.L. Dym, University of Massachusetts, United States of America; E.W. East, US Army Construction Engineering Research Laboratory, United States of America; Professor S.J. Fenves, Carnegie-Mellon University, United States of America; Dr M.A. Fischer, Stanford University, United States of America; Dr R. Fruchter, Stanford University, United States of America; Dr H. Furuta, Kyoto University, Japan; Professor J.M. De La Garza, Virginia Polytechnic Institute and State University, United States of America; Professor J.S. Gero, The University of Sydney, Australia; Professor F.C. Hadipriono, Ohio State University, United States of America; Professor P. Hajela, Rensselaer Polytechnic Institute, United States of America; Dr B.G. Heydecker, University College, London, U.K.; K. Kahkonen, Technical Research Centre of Finland, Espoo, Finland; A.I. Khan, Heriot-Watt University, Edinburgh, U.K.; Dr B. Knight, The University of Greenwich, London, U.K.; Dr V.K. Koumoussis, National Technical University of Athens, Greece; Professor C.S. Krishnamoorthy, Indian Institute of Technology - Madras, India; Dr B. Kumar, University of Strathclyde, Glasgow, U.K.; J. Lansdown, Middlesex Polytechnic, U.K.; Professor K.H. Law, Stanford University, United States of America; Professor K.L. Lawrence, The University of Texas at Arlington, United States of America; Professor Liu Xihui, China Academy of Electronics & Information Technology, Beijing, P R China; Professor I.A. MacLeod, University of Strathclyde, Glasgow, U.K.; Professor M.L. Maher, University of Sydney, Australia; Dr J. Miles, University of Wales, Cardiff, U.K.; Dr S.G. Ritchie, University of California, Irvine, United States of America; Dr S. Rowlinson, Hong Kong University; Dr G.G. Roy, The University of Western Australia, Australia; Dr H.C. Shah, Stanford University, United States of America; Dr C.-K. Soh, Nanyang Technological Institute, Singapore; Dr W.J. Spencer, Swinburne Institute of Technology, Australia; Professor D. Sriram, Massachusetts Institute of Technology, Cambridge, United States of America; Professor G. Yagawa, University of Tokyo, Japan; and Dr K. Zreik, Association EuropIA, Paris, France.

Finally, I should like to thank the other members of the Heriot-Watt University's *Structural Engineering Computational Technology Research Group* in particular: Asad Khan, János Sziveri, Jørgen Stang, Ardeshir Bahreininejad, João P. de Barros Leite and Janet Wilson.
