CONFERENCE SPONSORS

**THE CONSTRUCTION INDUSTRY
COMPUTING ASSOCIATION
THE CHARTERED INSTITUTE OF BUILDING
INSTITUTION OF CIVIL ENGINEERING SURVEYORS
"CONSTRUCTION COMPUTING"
and
THE DEPARTMENT OF CIVIL ENGINEERING
CITY UNIVERSITY, LONDON**

CONFERENCE ADVISORY BOARD

Professor H. Adeli
Ohio State University,
Columbus, Ohio, U.S.A.

Dr R. J. Allwood,
University of Loughborough,
Leicestershire, U.K.

Professor A. K. Azad,
King Fahd University of
Petroleum & Minerals,
Dhahran, Saudi Arabia.

Dr Martin Barnes,
Martin Barnes Project Management,
Deloitte Haskins & Sells, London,
U.K.

Dr Michael Barnes,
The City University, London, U.K.

W. T. Bell, Contract Data
Research,
Castleton, Sheffield, U.K.

Professor J. Christian,
University of New Brunswick,
Canada.

Professor M. Crisfield,
Transport & Road Research
Laboratory,
Crowthorne, Berkshire, U.K.

Professor S. J. Fenves,
Carnegie-Mellon University,
Pittsburgh, Pennsylvania, U.S.A.

M. J. Fort, *representing the*
Institution of Civil Engineering
Surveyors, Altrincham,
Cheshire, U.K.

Professor John S. Gero,
Architectural Computing Unit,
Department of Architectural
Science, University of Sydney,
Sydney, Australia.

Professor D. E. Grierson,
University of Waterloo,
Waterloo, Ontario, Canada.

Professor L. Gruendig,
Institut für Geodäsie und
Photogrammetrie,
Technische Universität Berlin,
West Germany.

Ian Hamilton,
CICA, Cambridge, U.K.

Professor H. B. Harrison,
School of Civil & Mining Eng.,
The University of Sydney,
Sydney, Australia.

Dr E. Hinton,
University College of Swansea,
University of Wales, Swansea,
U.K.

Professor R. M. W. Horner,
University of Dundee, Dundee,
U.K.

Professor A. Jennings,
The Queen's University of
Belfast,
Belfast, U.K.

Professor P. W. Jowitt,
Heriot-Watt University,
Edinburgh, U.K.

Professor U. Kirsch,
Technion-Israel Institute of
Technology,
Haifa, Israel.

K. J. Lane, *representing the*
Chartered Institute of Building and
"Construction Computing",
Ascot, Berkshire, U.K.

Professor H. Liebowitz,
The George Washington University,
Washington D.C., U.S.A.

Dr M. Papadrakakis,
National Technical University,
Athens, Greece.

Professor Naruhito Shiraishi,
Kyoto University, Kyoto, Japan.

Professor W. R. Spillers,
Rensselaer Polytechnic Institute,
Troy, New York, U.S.A.

David Taffs,
Ove Arup & Partners, London, U.K.

Professor A. B. Templeman,
University of Liverpool, Liverpool,
U.K.

Dr B. H. V. Topping,
Heriot-Watt University, Edinburgh,
U.K.

Dr G. J. Turvey,
University of Lancaster, Lancaster, U.K.

Professor K. S. Viridi,
The City University, London, U.K.

Dr D. S. Wakefield,
Buro Happold, Bath, U.K.

CONTENTS

I PROFESSIONAL ISSUES

THE USE OF INFORMATION TECHNOLOGY IN CONSTRUCTION RELATED CONSULTANCIES B. E. Tuckwood, Ernst & Young Management Consultants, London	1
THE COMPUTER IN THE CONSTRUCTION INDUSTRY Dr. F. T. Najafi, Department of Civil Engineering, University of Florida, United States of America	9
PC CAD COMES OF AGE L. A. Cheney and R. A. Ryder, Elstree Computing Ltd, Boreham Wood, England	17
Constructability and Detailed Design G. F. Jergeas, A. H. Tyler and Professor R. McCaffer Department of Civil Engineering, Loughborough, England	23

II THE USE OF COMPUTERS IN CONSTRUCTION MANAGEMENT

COMPUTER AIDED CONSTRUCTION PROJECT MANAGEMENT R. M. W. Horner, A. J. Mair, K. M. Peebles and R. Zakieh, Department of Civil Engineering, Dundee University, Scotland	29
MFMR: MICRO-COMPUTERIZED FIVE MINUTE RATING Dr Fwu-shiun Liou, Department of Architectural Engineering, University of Kansas, United States of America	39
A CONTRACT VALUATION SYSTEM D. J. Schofield, Roadworks (1952) Ltd., Ipswich, England	45
DYNAMIC SIMULATION APPLIED TO MATERIALS HANDLING IN HIGH RISE CONSTRUCTION D. A. Wijesundera*, P. O. Olomolaiye** and F. C. Harris**, *Conder Group plc, Burton on Trent, **School of Construction, Engineering and Technology, Wolverhampton Polytechnic, England	51
A SITE BASED DATA CAPTURE AND INFORMATION SYSTEM FOR THE CONSTRUCTION INDUSTRY M. T. James* and A. Thorpe+, *Charles Gregory Ltd, Loughborough, +Department of Civil Engineering, University of Loughborough, England	57
USING COMPUTERS TO AID INTEGRATION OF SOME CONSTRUCTION MANAGEMENT TASKS M. J. Mawdesley*, W. H. Askew* and J. Taylor**, *Department of Civil Engineering, University of Nottingham, **Tarmac Construction, Major Products Division, London	63
APPLICATION OF DATABASE MANAGEMENT SYSTEMS IN PRODUCTIVITY ANALYSIS Professor R. M. W. Horner and B. T. Talhouni, Department of Civil Engineering, University of Dundee, United Kingdom	69
TIME AND COST RISK ANALYSIS Dr G. Willmer, Department of Civil Engineering, UMIST, Manchester	77
A SOFTWARE PACKAGE FOR COST ANALYSIS AND ESTIMATING FOR MASONRY CONTRACTORS Dr Fwu-Shiun Liou, Department of Architectural Engineering, University of Kansas, United States of America.....	85
COMPUTERIZED CRANE SELECTION AND PLACEMENT FOR THE CONSTRUCTION SITE C. W. Farrell and K. C. Hover, School of Civil and Environmental Engineering, Cornell University, Ithaca, New York, United States of America.....	91

III COMPUTER AIDED DESIGN

INTERACTIVE COMPUTER-AIDED FORMWORK DESIGN J. H. M. Tah and A. D. F. Price, Department of Civil Engineering, Loughborough University, Leicestershire, England	95
COMPUTER AIDED DESIGN/DRAFTING MANAGEMENT WITHIN THE UNITED STATES AIR FORCE LOGISTICS COMMAND CIVIL ENGINEERING ORGANIZATION W. D. Alley, Wright-Patterson Air Force Base, Ohio, United States of America.....	105
THE NEED FOR AN INTEGRATED 2D/3D CAD SYSTEM IN STRUCTURAL ENGINEERING Dr A. S. Watson and C. J. Anumba, Department of Civil Engineering, University of Leeds, Leeds	111
A TEACHING COMPANY PROGRAMME TO INTRODUCE CAD INTO A MEDIUM SIZED CONSULTANCY PRACTICE A. J. Chadwick, M. H. Dawes, S. Bryant, S. Ratledge, Department of Civil Engineering, Brighton Polytechnic, Brighton, England	119

IV PRE AND POST PROCESSING FOR STRUCTURAL ENGINEERING COMPUTER AIDED DESIGN

- ELEMENTS OF FORMIAN** H. Nooshin and P. Disney, Space Structures Research Centre, Department of Civil Engineering, University of Surrey, Guildford, Surrey, England 127
- A CONNECTIVITY COORDINATE SYSTEM FOR NODE AND ELEMENT ORDERING** Professor A. Kaveh, Department of Civil Engineering, Iran University of Science and Technology, Tehran, Iran 149

V ANALYSIS AND DESIGN OF STEEL STRUCTURES

- FUNCTIONAL MODELLING OF THE CONSTRUCTIONAL STEELWORK INDUSTRY** P. B. Hirst and A. S. Watson, Department of Civil Engineering, University of Leeds, Leeds, England 157
- PRODUCTION RELATED DESIGN OF HEAVY STEELWORK BOX COLUMNS** M. M. M. Zayyat, N. J. Smith and D. A. Nethercot, Department of Civil and Structural Engineering, University of Sheffield, Sheffield 171
- AUTOMATIC DESIGN SYSTEM FOR STEEL FRAMES** Professor Yeong-Bin Yang and Chin-Ching Kuo, Department of Civil Engineering, National Taiwan University, Taipei, Taiwan, Republic of China 177

VI ANALYSIS AND DESIGN OF REINFORCED CONCRETE STRUCTURES

- SECOND STAGE CONCRETE STRESS ANALYSIS AROUND A PELTON TURBINE** E. C. Kalkani* and A. Nicolopoulos**, *National Technical University of Athens, Greece, **Public Power Corporation, Athens, Greece 183
- INSTABILITY OF REINFORCED CONCRETE AND MASONRY WALLS** S. E. El-Metwally*, A. F. Ashour* and S. A. Saafan**, *Structural Engineering Department, El-Mansoura University, El-Mansoura, Egypt, **Faculty of Engineering, Ain Shams University Cairo, Egypt 191
- STUDY OF BOND STRENGTH RELIABILITY OF RC BEAMS** Professor S. A. Mirza, Department of Civil Engineering, Lakehead University, Thunder Bay, Ontario, Canada 203
- LIFE-CYCLE STUDIES OF A CONCRETE STRUCTURE USING SIMULATION ON A MICROCOMPUTER** S. Gowripalan, J. Shakil and G. Singh, Department of Civil Engineering, University of Leeds, Leeds, England 209

VII STRUCTURAL ANALYSIS AND DESIGN

- SAINT-VENANT TORSIONAL PROPERTIES OF CONCRETE SECTIONS** Dr D. Johnson, Department of Civil Engineering, North East London Polytechnic, Dagenham, Essex 217
- APPLICATION OF THE FINITE DIFFERENCE TECHNIQUE TO THE ANALYSIS OF FLEXIBLE RISER SYSTEMS** P. A. Brown, A. Soltanahmadi and R. Chandwani, Zentech Consultants, London, England 225
- A TIME SAVING NUMERICAL TECHNIQUE WITH DISPLACEMENT CONTROL FOR THE ANALYSIS OF FRAME STRUCTURES** S. E. El-Metwally* and H. M. Hosny**, Structural Engineering Department, El-Mansoura University, **Matarya Faculty of Engineering and Technology, Helwan University, Cairo, Egypt 233
- NUMERICAL ANALYSIS OF SANDWICH BEAMS** T. A. M. Salet and S. A. Hamelink, Faculty of Architecture and Building Science, Department of Structural Design, Eindhoven University of Technology, Eindhoven, The Netherlands 237
- STATIC ANALYSIS OF HELICOIDAL BARS** Dr S. A. Al-Ghamdi* and Professor J. J. Tuma**, King Fahd University of Petroleum and Minerals, Saudi Arabia, **Arizona State University, Temple, Arizona, United States of America 247
- EXACT GEOMETRY CONSIDERATIONS IN BUCKLING ANALYSIS OF TRUSSES** R. Levy, O. Vilnay and K. B. Acheampong, Faculty of Civil Engineering, Technion-Israel Institute of Technology, Technion City, Haifa, Israel 259
- SOME RECENT APPLICATIONS OF THE DISCRETE ELEMENT METHOD** Professor H. B. Harrison, School of Civil and Mining Engineering, The University of Sydney, Australia 269
- FORCE RECOVERY PROCEDURES IN NONLINEAR ANALYSIS** Yeong-Bin Yang and Liang-Jebq Leu, Department of Civil Engineering, National Taiwan University, Taipei, Taiwan 275

AIRPORT PAVEMENT EVALUATION BASED ON FALLING WEIGHT DEFLECTOMETER MEASUREMENTS Ali A. H. Sha'ath, Civil Engineering Department, The Queen's University, Belfast, United Kingdom.....	281
HIGHER ORDER THEORIES FOR THICK LAYERS OF TRANSVERSELY ISOTROPIC MATERIAL WITH LOADING SYMMETRIC ABOUT THE MIDDLE PLANE S. Faraji, Department of Civil Engineering, University of Lovell, Massachusetts, United States of America	287
RESIDUAL STRENGTH OF SPACE TRUSSES WITH DAMAGED MEMBERS Hui-shen Shen, Zhihong Yuan and Shao-pei Lin, Department of Civil Engineering, Shanghai Jiao Tong University, Shanghai, People's Republic of China	293
IMPROVING THE EFFICIENCY OF PRECONDITIONING FOR ITERATIVE METHODS M. Papadrakakis and M. C. Dracopoulos, Department of Civil Engineering, National Technical University Athens, Greece	297

VIII FINITE ELEMENT ANALYSIS SYSTEMS

RECENT DEVELOPMENTS IN THE LUSAS FINITE ELEMENT SYSTEM L. P. R. Lyons, A. J. Kent, A. P. Bell and A. J. L. Crook, Finite Element Analysis Ltd, Kingston-upon-Thames, Surrey, England	307
LARGE CONCRETE STRUCTURE COMPUTING INVOLVING A MICROCOMPUTER IMPLEMENTATION OF THE FEM J. Texereau* and R. Souchet+, *Consulting Engineer, Poitiers, +Universite de Poitiers, France	315
THE FELASH SUITE OF PROGRAMS FOR THE ANALYSIS OF AXISYMMETRIC SHELLS Professor J. M. Rotter, Department of Civil Engineering, Edinburgh University, Edinburgh	323

IX NON-LINEAR FINITE ELEMENT STRUCTURAL ANALYSIS

NON-LINEAR FINITE ELEMENT DYNAMIC ANALYSIS OF TWO-DIMENSIONAL CONCRETE STRUCTURES F. B. A. Beshara and Professor K. S. Viridi, Structures Research Centre, Department of Civil Engineering City University, London	329
GENERAL EIGENVALUE TEST FOR NONLINEAR FINITE ELEMENTS Wenchin Liu* and Professor Yeong-Bin Yang**, *Chung-Cheng Institute of Technology, Taoyuan, Taiwan, **National Taiwan University, Taipei, Taiwan	345
NUMERICAL STUDY OF SPECIMENS SUBJECTED TO SHEAR COMPRESSION STRESS FIELD J. Davies, Department of Civil Engineering, The Polytechnic of Wales, Pontypridd, Wales	351
USE OF NONELASTIC STRESS FIELDS IN THE DESIGN OF REINFORCED CONCRETE SLABS P. Bhatt & M. Benredouane, Department of Civil Engineering, University of Glasgow, Glasgow, Scotland	361
CRACK PROPAGATION ANALYSIS IN CIVIL ENGINEERING STRUCTURES T. Taniguchi, Engineering Science Department, Okayama University, Okayama, Japan	371

PREFACE

These proceedings contain the eighty-nine papers presented at CIVIL-COMP 89, The Fourth International Conference on Civil and Structural Engineering Computing which was held at the City University, London during 19th-21st September 1989. The thirty six papers presented at the Artificial Intelligence CIVIL-COMP 89 are published in "Artificial Intelligence Applications and Techniques for Civil and Structural Engineers", Civil-Comp Press, 1989 (*ISBN 0-948749-13-X*).

The first conference in the CIVIL-COMP series was held in London during November 1983 and concentrated on the application of micro and mini computers to civil and structural engineering. Forty papers were presented at that conference which was opened by David Taffs of Ove Arup & Partners, London. Owing to the greater number of participants, the 1985 conference was held at the Institution of Civil Engineers, London. One hundred and thirty-four papers, covering a wide range of applications, were presented. The hardware discussed ranged from the Cray X/MP supercomputer to programmable calculators. Eighty-seven papers were presented at the 1987 meeting which was also held at the Institution of Civil Engineers, London. In 1987, sixteen other papers were presented on applications of artificial intelligence to civil and structural engineering. These sixteen papers were published with reprints of five artificial intelligence papers from the 1985 conference in "The Application of Artificial Intelligence Techniques to Civil and Structural Engineering", Civil-Comp Press, 1987 (*ISBN 0-948749-06-7*).

In 1983, many practising engineers were apprehensive of the use of computers in civil engineering. In particular, the use of microcomputers was a source of much debate. Today, the role of the microcomputer is taken for granted. In 1989, the use of expert systems appears to have become a topic of heated debate. The same luddite criticisms which were levelled at microcomputers in 1983 are now being made of expert systems in 1989. It is sad that for the most part industry has failed to solve a number of practical problems which hamper the efficient use of computers in practice. Among these must come compatibility for data; graphics and other communication between systems.

I would particularly like to thank David Taffs of Ove Arup and Partners for his contribution to each of the four meetings and his general support of the CIVIL-COMP series of meetings. I should also like to express my gratitude to all those members of the Editorial Board without whose help it would have been difficult to organise such broad based conferences. The assistance of the sponsors in organising the meeting is greatly appreciated. In particular, I am very pleased that this conference was held in and sponsored by The Department of Civil Engineering, City University, London since I was both an undergraduate and postgraduate student in the Department. I would like to thank Dr M. R. Barnes and Professor K.S. Viridi for their valuable help in organising this conference at the City University.
