Keyword Index

- absorbing boundary conditions, 69, 127
- acoustic, 37
- acoustic scattering, 1, 263
- acoustics, 99
- algebraic eigenvalue problems, 181
- algebraic model reduction, 233
- Arnoldi method, 233
- BEM, 295
- boundary integral equations, 1
- computational acoustics, 207
- coupled problem, 159
- coupling, 1
- cross-points, 1
- domain decomposition method, 1, 159, 263
- fast algorithms, 207
- FEM, 295
- finite differences, 69
- finite element method, 1, 263
- finite elements, 37, 69
- fluid-structure interaction, 159
- Fréchet derivative, 263
- generalised eigenvalue problem, 181
- generalised impedance boundary conditions, 207
- Helmholtz equation, 1, 37, 127
- high frequency, 207
- hyperbolic systems, 99
- ill-posed problem, 263
- integral equations, 207
- inverse obstacle problem, 263
- iterative linear system solver, 233
- Krylov methods, 127, 233
- Lanczos method, 181
- measurements, 295
- modal truncation, 233
- multi-pass iterative, 99
- Newton method, 263
- non-matching grids, 159
- non-reflecting boundary conditions, 69, 207
- numerical methods, 295
- on-surface radiation condition, 207
- Padé via Lanczos method, 233
- parallel computing, 159
- perfectly matched layers, 69
- preconditioner, 207
- preconditioning, 127
- quadratic eigenvalue problem, 181
- radiation, 37
- scattering, 37
- sensitivity analysis, 263
- sound radiation, 295
- sound transmission, 295
- space-time, 99
- spectral transformation, 181
- sub-structuring method, 159
- surface scattering, 207
- Tikhonov regularization, 263
- time-discontinuous Galerkin, 99

unbounded, 37

validation, 295

verification, 295

vibro-acoustic, 159

wave propagation, 69

waves, 99

Copyright Permissions

The authors of each chapter have warranted that they have obtained permission from the copyright holder of any third party material included in their chapter. The authors have further warranted that they held the copyright of their chapter prior to assigning it to the publishers.

Every effort has been made by the editor and the publishers to acknowledge all sources and copyright holders. In the event of any copyright holder being inadvertently omitted, please contact the publisher directly.

The authors, editor and publishers wish to thank the following for the copyright permissions given:

Figure 2.6, ©1998, American Institute of Physics, Melville, New York, USA, first published in R. Astley, G. Macaulay, J.-P. Coyette, and L Cremers “*Three dimensional wave envelope elements of variable order for acoustic radiation and scattering Part I. Formulation in the frequency domain*”, Journal of the Acoustical Society of America, 103, pages 49-63, 1998, appears with permission.

Figure 2.7, ©1987, Elsevier Science Limited, Oxford, England, first published in P. Gorranson and C. F. Davidsson “*Three-dimensional infinite elements for wave propagation*”, Journal of Sound and Vibration, 115, 556-559, 1987, appears with permission from Elsevier.

Figure 2.8, ©1994, American Institute of Physics, Melville, New York, USA, first published in D. Burnett, “*A three-dimensional acoustic infinite element based on a prolate spheroidal multipole expansion*”, Journal of the Acoustical Society of America, 96, 2798–2816, 1994, appears with permission.

Figures 2.9 and 2.11, ©2001, John Wiley and Sons Ltd, first published in R.J. Astley and J. P. Coyette ‘Conditioning of infinite element schemes for wave problems’, Communications in Numerical Methods in Engineering, 17, 31-34, 2001, appears with permission from John Wiley and Sons Ltd.

Figures 3.1, 3.2, 3.3, 3.4, 3.6, 3.7, 3.8 and 3.9, ©2005, John Wiley and Sons Ltd, first published in Murthy N. Guddati, Keng-Wit Lim, ‘Continued fraction absorbing boundary conditions for convex polygonal domains’, International Journal for Numerical Methods in Engineering, 66, 6, 949-977, 2005, appears with permission from

John Wiley and Sons Ltd.

Figures 4.8, 4.9, and 4.10 first appeared in Lonny L. Thompson and Prapot Kunthong, "Stabilized Time-Discontinuous Galerkin Methods with Applications to Structural Acoustics," Proceedings IMECE'06, ASME Int. Mechanical Engineering Congress and Exposition, Paper Number IMECE2003IMECE2006-15753, 2006. appears with permission of ASME, New York, United States of America.

Figures 4.11, 4.12, 4.13, 4.14, and 4.15 first appeared in Lonny L. Thompson and Dantong He, "Local Space-Time Adaptive Discontinuous Galerkin Finite Element Methods for Time-Dependent Waves," Proceedings IMECE'03, ASME Int. Mechanical Engineering Congress and Exposition, Paper Number IMECE2003/NCA-42542, 2003, appears with permission of ASME, New York, United States of America.

Chapter 6 is an updated version of '*Sub-Structuring Method for Fluid-Structure Interaction Problems with Non-Matching Grids*', by F. Magoulès and F.-X. Roux, published in *Innovation in Engineering Computational Technology*, edited by B.H.V. Topping, G. Montero and R. Montenegro, Chapter 13, 269-285, 2006, Saxe-Coburg Publications.
