Author Index

Barbone, P.E., 417
Bazilevs, Y., 1
Belouettar, S., 287
Benjeddou, A., 287
Boisse, P., 249
Bouillard, Ph., 303
Bradford, M.A., 501

Casciati, F., 439
Cognard, J.Y., 225
Cottrell, J.A., 1
Créac'hcadec, R., 225

Davies, P., 225
Daxner, T., 205
De Roeck, G., 159
Deng, H., 475

Eckardt, S., 133

Farshad, M., 541
Fernandez-Mendez, S., 23
Fischer, F.D., 205
Frangopol, D.M., 95
Friedl, N., 205

Geers, M.G.D., 303
Giuliano, F., 439
Givoli, D., 417

Häfner, S., 133
Hajela, P., 51
Holnicki-Szulc, J., 517
Huerta, A., 23
Hughes, T.J.R., 1

Ibrahimbegovic, A., 181

Karihaloo, B.L., 265
Könke, C., 133
Krätzig, W.B., 111
Kwan, A.S.K., 475

Le Houédec, D., 393

Maldonado, M., 393
Massart, T.J., 303
McClure, G., 371
Mikulowski, G., 517
Mroz, A., 517
Mullur, A.A., 51
Muscolino, G., 325

Neves, L.C., 95

Palmeri, A., 325
Patlashenko, I., 417
Pawlowski, P., 517
Peerlings, R.H.J., 303

Rammerstorfer, F.G., 205
Reali, A., 1
Ribeiro, P., 349

Schuëller, G.I., 75
Sohier, L., 225

Vidal, Y., 23

Xiao, Q.Z., 265

Zhang, Y.X., 501

Keyword Index

active damage detection, 287
ADAP, 541
adaptive impact absorption, 517
adhesion, 225
advanced algorithms, 75
Arcan fixture, 225
attenuation of ground vibrations, 393

B-splines, 1
bridges, 95
buckling, 205

cable failure, 371
cohesive crack, 265
composite, 225
composite pipes, 541
computational efficiency, 75
computational technology, 541
concrete, 133
condition, 95
controlled shock-absorbers, 517
coupling with finite elements, 23
crack, 265

damage, 133, 303
damage assessment, 159
design, 181
Dirichlet-to-Neumann map, 417
dynamics, 371

electro-mechanical coupling coefficient, 287
element-free Galerkin, 23
energy dissipation, 303
enrichment scheme, 265
expert system, 541
extended-generalised finite element method, 265

failure analysis, 541
fibrous material mechanical behaviour, 249
finite element modelling, 371
finite element updating, 159
finite elements, 1, 225, 417, 501
fire, 501
forming limit, 205
fracture, 133
free vibration analysis, 287

generalised Maxwell model, 325
geometrical stability, 475

heterogeneous materials, 133

ice shedding, 371
identification, 181
incompressibility, 23
inelastic materials, 181
infinitesimal mechanism, 475
internal resonances, 349
isolation of vibrations, 393

Laguerre polynomial approximation technique, 325
layered, 501
lifecycle analysis, 541
lifecycle performance, 95
lifetime cost, 95
linear dynamic systems, 417
localisation, 303
long-term extrapolation, 541

maintenance, 95
marine structures, 225
masonry, 303
meshfree, 23
meshless, 23
meso macro analyses, 249
metal forming, 205
Mindlin plate, 501
modal properties, 159
modal reduction, 417
modal strain energy method, 325
model reduction, 417
Monte Carlo simulation, 75
moving least squares, 23
multi-grid solver, 133
multi-scale analysis, 181
multi-scale modelling, 303
multiple tuned mass damper, 439

necking, 205
non-linear behaviour, 225
non-linear modes, 349
non-linear simulation, 111, 501
numerical methods, 393
NURBS, 1

optimal design, 517
optimization, 51, 95
overhead lines, 371

passive control, 439
passive shunted damping, 287
piezoelectric adaptive structures, 287
pipelines, 541
plastic pipes, 541
plates, 349
pre-stressed mechanism, 475
probability, 95
propagation of vibrations, 393

quasi-brittle behaviour, 303

railway vibrations, 393
random vibration, 325
real-time load identification, 517
reinforced concrete, 501
reliability, 95
residual stresses, 205
rolling, 205

seismic design, 111
shells, 349
shock loads, 371
slabs, 501
smart pipelines, 541
smooth particle hydrodynamics, 23
spatial multi-scale models, 133
standards, 541
state-space formalism, 325
static-kinematic analysis, 475
stress recovery, 265
structural analysis, 541
structural control, 517
structural damage, 111
structural reliability, 51, 75
structural stability, 475
structural vibrations, 1
substructure, 417
suspension bridges, 439
system identification, 159

temporal multi-scale models, 133
textile composite reinforcements, 249
tower, 439
tuned mass dampers, 439

uncertainty, 51, 75

vehicle-track interaction, 393
vibration monitoring, 159
vibrations, 349, 417
virtual tests, 249
viscoelastic devices, 325
vulnerability, 111
