Zhang, H., 1
Zingoni, A., 283

Keyword Index

- adaptivity, 123
- analysis, 319

- b-spline strip method, 197
- balance equation, 153
- bending-torsion warping coupling, 221
- bifurcation analysis, 283

- cable, 379
- component mode synthesis, 255
- composite plates, 239
- concept of effective stress, 153
- concrete, 63, 183
- configuration processing, 319
- coupled primary-secondary systems, 255
- creep and shrinkage analysis, 183
- curved beams, 409
- cutting pattern, 379

- damage, 123
- damage measure, 351
- decomposition, 319
- deformation of solid skeleton, 153
- design rules, 409

- eigenvalue problems, 283
- engineering software, 183
- extended finite elements, 123

- fabric, 379
- failure probability, 93
- finite element, 319
- finite elements, 409
- finite-element formulation, 283
- fluid flows, 1
- fluid-solid interaction, 153
- force method, 319
- form finding, 379

- graph theory, 319
- group theory, 283

- heat, 63

- incompatible modes, 33

- Latin hypercube sampling, 93
- localization, 123

- mass, 63
- material damage, 351
- mechanical damage, 63
- membrane, 379
- meshless, 319
- minimum surface area, 379
- moisture and heat transfer, 153
- moisture and heat transport analysis, 183
- mortar method, 239
- multilayered shells, 221

- Navier-Stokes fluids, 1
- nonlinear fracture mechanics, 93
- nonlinear shells, 33
- nonlinearity, 409
- nonlocal continuum, 123
- numerical procedures, 153

- optimization, 239
- ordering, 319

- piezoelectric laminates, 221
- piezoelectric materials, 197
- plasticity, 409
- practical implementation, 183

- quasibrittle failure, 123

- random fields, 93

reinforced concrete, 183
reinforced concrete structures, 351
representation theory, 283
retention curves, 153
rigidity, 319

safety and reliability, 93
shear-membrane refinements, 221
shell structures, 1
simulated annealing, 197
simulation, 351
size effect, 93
softening, 123
solid mechanics, 283
statistical uncertainties, 351
stochastic finite element method, 93
stress computations, 221
structural interactions, 1
structural mechanics, 283
structure-subsoil interaction, 153
substructuring, 255
symmetry groups, 283

tension, 379
thermo-chemical damage, 63
thickness change, 33
third-order plate theory, 197
topology, 319
transformation, 319
triangular C^1 - $C^{1/2}$ finite element, 221

vibration analysis, 283

Weibull theory, 93
