Ambrósio, J., 169
Askes, H., 145
Augusta Neto, M., 169

Barros, R.C., 269
Bartoli, G., 309
Betti, M., 309
Borri, C., 309

Calderón, P.A., 329
Calvo, B., 49
Carrera, E., 75
Cesar, M.B., 269

De, S., 25
Doblaré, M., 49

Gilbert, M., 145
Giunta, G., 75

Iannucci, L., 245

Le, C.V., 145
Lebon, F., 113
Lourenço, P.B., 1

Martínez, M.A., 49
Milani, G., 1
Muscolino, G., 221

Oliveira, D.V., 1

Peña, E., 49
Petrolo, M., 75

Rahul, 25
Rozvany, G.I.N., 201

Sofi, A., 221

Keyword Index

- algorithm verification, 201
- analytical benchmarks, 201
- anisotropic hyperelasticity, 49
- armour, 245
- asymptotic theory, 113

- beam-on-spring methods, 329
- blood vessels, 49

- checkerboard control, 201
- co-rotational formulations, 169
- cultural heritage, 309

- deep excavations, 329
- diaphragm walls, 329
- discretized topologies, 201
- displacement and equilibrium element-free Galerkin models, 145
- dynamic analysis, 269
- dynamic assessment, 309
- dynamic interaction, 221

- engineering applications, 1
- ESO, 201

- finite element method, 329
- finite element modelling, 245
- finite elements, 49, 75

- Galerkin method, 221
- generalized shape optimization, 201
- global-local method, 25
- ground movement, 329

- hierarchical multiscale, 25
- high performance fibres, 245
- homogenization, 1

- impact, 245
- industrial applications, 201
- initial strains, 49
- interface, 113

- Jacobian-free Newton-Krylov, 25

- large rotations, 169
- layout optimization, 201
- level set method, 201
- ligaments, 49
- limit analysis, 145
- linear elastodynamics, 169

- masonry, 1, 309
- massively parallel systems, 25
- meshfree methods, 145
- micro-modelling, 1
- mode-acceleration method, 221
- moving oscillators, 221
- multiscale modeling, 25

- non-linear analysis, 1, 309
- non-linear deformations, 169
- numerical methods, 329
- numerical modelling, 309

- performance based design, 269
- plates, 145
- preconditioner, 25
- preoperative planning, 49
- pushover, 269

- quasi-static solution, 221

- refined beam theories, 75

- second-order cone programming, 145
- shell capabilities, 75

SIMP method, 201
singular topologies, 201
slope discontinuity, 221
smoothing technique, 145
soft tissues, 49
static assessment, 309
static modes, 169
static non-linear analysis, 269
suspended cable, 221

thin layer, 113
thin walled sections, 75
topology optimization, 201

unified formulation, 75

variational statement, 75
viscoelasticity, 49
