Bayesian inference, 37  
bee inspired algorithms, 129  
bridges, 37  
CO2 emissions, 61  
complex adaptive systems, 1  
convergence, 1  
damage identification, 37  
decision support systems, 171  
differential evolution, 129, 157  
ecosystems, 1  
emergent engineering, 1  
environmental impacts, 61  
fresh concrete casting, 21  
fresh concrete rheology, 21  
fuzzy control, 129  
genetic algorithms, 117, 129, 157, 171  
health monitoring, 157  
inspection scheduling, 117  
intelligence era, 1  
interface-capturing, 21  
life-cycle optimization, 117  
long wavelength roughness, 185  
low volume traffic roads, 185  
maintenance model, 185  
maintenance scheduling, 117  
Markov decision process, 185  
neural network analysis, 185  
neural networks, 37  
non-Newtonian flow, 21  
optimal sensor placement, 157  
optimization, 61  
optimum design, 89  
parametric identification, 157  
particle swarm optimization, 129, 157  
pavement condition, 61  
pavement deterioration models, 185  
pavement maintenance, 61  
pavement management, 61  
pavement roughness, 185  
railway track maintenance and renewal,  
171  
reliability analysis, 89  
risk analysis, 89  
risk optimization, 89  
road sustainability, 61  
robust optimization, 89  
seismic protection, 157  
smart environment, 1  
smart structures, 129  
social impacts, 61  
soft computing approach, 37  
structural health monitoring, 37  
structural optimization, 89  
surface profile, 185  
uncertainty quantification, 89
