

Index

- acceleration, 143–177
- accelerometer, 87
- Aceh earthquake, 89
- active control, 244, 245, 253
- active vibration control, 239
- Adeli, H., 239
- Alfred P Murrah Building, Oklahoma City, 315
- along-wind response, 195
- ambient data, 159–161
- Ashiyahama Residential Building Complex, Japan, 116
- Atwood Building, Anchorage, Alaska, 147, 148, 171–173

- Barros, R.C., 13
- base shear, 108
- blast confinement, 304
- blast loading, 299–316
- blast loads, 307
- blast parameters, 300
- blast shielding, 304
- blast wave, 300
- blast wave clearing, 303
- blast wave reflection, 301
- bomb threats, 314
- brace-column connection, 133
- Brownjohn, J.M.W., 87
- buffeting factors, 190
- building codes, 267
- building design, 56
- building moments, 11
- building monitoring, 87
- building movements, 1
- building robustness, 314

- Burj Khalifa, 2

- CAARC building model, 197, 199, 200
- Chi-Chi earthquake, Taiwan, 265–298
- Chrysler Building, New York, 241
- client software, 157, 159
- Colaco, J.P., 1
- column-column joints, 133
- connections, 137
- construction, 265–298
- control strategy, 252
- core walls, 4
- coupled building response, 71
- coupled modes, 64
- coupled motion, 184
- coupled response, 58, 81
- cross-wind response, 188, 189, 191, 195

- damage, 265–298
- damage detection, 244, 248, 254
- damage evaluation, 250
- damage identification, 141
- damping ratios, 230
- data acquisition, 158
- data utilization, 146
- Delgado, R., 13
- design, 1
- design principles, 10
- detailing, 289
- Di Wang Tower, China, 214, 221, 228, 229, 232, 233
- drift ratio, 143–177
- dynamic analysis, 56–83, 131
- dynamic characteristics, 93, 225
- dynamic fuzzy WNN model, 246–248
- dynamic wind loading, 57

- E-Sun Building, Taiwan, 272
 earthquake damage, 115
 earthquake engineering, 141
 earthquake loading, 71
 earthquake motion, 126
 earthquakes, 87–111, 265–298
 economics, 9
 EMD-HT method, 227
 Empire State Building, New York, 241
 equivalent static wind load, 62, 64, 69, 79
 Eurocode 1, 13
 expansion waves, 309
 explosion, 299–316
 explosions inside buildings, 306
- façade, 299–316
 Factor Building, Los Angeles, 151
 Ferreira, N.A.C., 13
 field measurement, 211–236
 fire, 1
 fire loads, 11
 flow patterns, 187, 188
 force spectra, 191
 fracture, 115
 free field motions, 104
 free-air blast, 302
 free-air burst, 300
 free-field instrumentation, 149
 fuzzy WNN model, 246
- generalized forces, 65
 genetic algorithms, 253
 girder design, 292
 glazing systems, 313
 global positioning system, 143–177
 GPS code, 87
 gravity loads, 1, 10
 gust factor, 223
- hemispherical surface burst, 300
 HFFB technique, 64
 high explosive damage assessment model, 306
 high wind, 211–236
 high-rise building, 115
- Hircon Tower, Dubai Marina, 9
 human comfort, 211–236
- identification, 211–236
 impulse, 299–316
 incident pressure, 302
 instrumentation, 95, 212
 integral length scale, 224
 interference effects, 184, 187
 internal blast pressure, 307
 iso-buffets, 189
- Jiang, X., 239
 Jin Mao Tower, Shanghai, 3
 John Hancock Centre, Chicago, 2, 6
- Khan, F., 2
 Kobe Earthquake, 141
 Kwok, K.C.S., 183
- lateral loads, 1, 10
 Lew, M., 265
 long-wind response, 188, 189, 191
 Los Angeles Tall Buildings Structural Design Council, 266
- material quality, 288
 measurement system, 217
 mega-structures, 115
 Mies Van der Rohe, 2
 Millikan Library, Pasadena, 151
 modal response, 75
 mode shapes, 93
- Naeim, F., 265
 natural frequencies, 228
 neural network, 244
 neuro-genetic algorithm, 253
 non-stationary model, 218
 nonlinear dynamics, 251
 Northridge earthquake, 296
- Oklahoma City explosion, 306
 Onterie Tower, Chicago, 3, 4
- Pan, T-C., 87
 peak dynamic response, 62

- peak pressure, 309
- peak pressure graphs, 309
- performance, 143–177
- Petronas Tower, Kuala Lumpur, 240
- plastic hinge, 123
- post modern movement, 2
- pressure, 299–316
- pressure distribution, 188
- pressure-time history, 305
- probability density function, 224
- progressive collapse, 1, 11
- punching shear, 292

- quasi-static gas pressure, 307

- random vibrations, 56
- real-time, 143–177
- record synchronization, 150
- recording systems, 150
- redundancy, 11
- reinforced concrete, 254, 272
- Republic Plaza, Singapore, 91–94
- resonant response, 59
- resonant static wind load, 63
- response correlation, 77
- response spectra, 104
- robustness, 299–316
- rod theory, 115
- Rose, T.A., 299

- San Simeon earthquake, 160, 164, 165
- scaled blast parameters, 300
- Sears Tower, Chicago, 2, 3, 241
- seismic design, 265–298
- seismic instrumentation, 146
- seismic monitoring, 143–177
- seismic resistance, 294
- seismic response, 61
- sensed data, 246
- SHAMRC computer code, 306
- Singapore Seismicity, 89
- Smith, P.D., 299
- soft soil, 91
- soil-structure interaction, 143–177
- source energy equivalence, 301

- special arrays, 153
- spectrograph, 110
- spine walls, 5
- state space vectors, 246, 253
- stationary wind model, 217
- steel building, 141, 255, 282
- strain rate, 115
- Strouhal number, 191
- structural control, 253
- structural dynamics, 56
- structural health monitoring, 239
- structural response, 143–177
- structural systems, 2, 4

- Taiwan Building Code, 267
- tall buildings, 1, 13, 184
- Thepmongkorn, S., 183
- threshold stages, 159
- time-varying mean system speed, 219
- TNT equivalence, 301
- torsional response, 194, 195, 292
- total peak response, 62
- Transamerica Building, San Francisco, 165, 168, 169
- transfer functions, 104
- tremor data, 96
- tubular design, 2
- tubular systems, 4
- tuned mass damper, 13
- turbulence intensity, 223
- Twin Towers, Century City, Los Angeles, 152
- Typhoon York, 220, 221

- Uniform Building Code, 147

- vibration control, 13
- vortex shedding, 191

- win tunnel test, 205
- wind characteristics, 216
- wind induced motion, 206
- wind loading, 57, 73, 206
- wind loading static equivalent, *see* equivalent static wind load
- wind loads, 56

wind response, 13
wind spectrum, 224
wind tunnel model, 197, 198
wind tunnel tests, 56
wind-induced pressure, 186
wind-induced response, 184, 230
Wood, G.S., 183
Woolworth Building, New York, 241
workmanship, 288
World Trade Center, New York, 3, 241
